

THE GAMMA CLUB

RESEARCH CLUB OF VNRVJIET

The Gamma Club

Research club of VNRVJIET

Overview

The Gamma Club is a research initiative by students and faculty of the Computer Science Department of VNRVJIEET, aimed at increasing the overall contribution of student's temperament and contribution to undergraduate research in cutting-edge technologies.

Goals

1. To help students get the exposure to and better understanding of the research world
2. Provide guidance in important research skills like the following but not limited to, technical paper reading, implementation, writing, and presentation, research project management, and networking
3. Encourage students and provide guidance to participate in hackathons, academic, and corporate research internships
4. Increase student publications and participation in national and international conferences

Proposed Activities

In order to achieve the goals of the research club, we propose the following activities

- Weekly meetings with pre-proposed agenda
- Monthly progress review
- Internal hackathons solely for research paper implementations
- Workshops on Latex, paper drafting, email-writing, developing great professor-student relationships, resume making, drafting internship applications, presenting research, etc
- Hosting guest lectures/ webinars from academic and industry researchers
- Periodic alerts regarding conferences, internships, and other research opportunities

Progress till date :

- Hosted inaugural meet describing the prime Objectives of the club (jan 24)
- Had discussions with Students to understand their area of interest also by circulating a google form to keep track of them(took longer than expected) (April 5)
- Came up with some suggestive project titles for students, also were open to their interests(April 24)
- Guided them with initial steps on how to collect the relevant information and tune their innovative thoughts by giving out the instructions on the path to be followed(In General) (May 17)
- Were able to guide the ones who have approached for any detail regarding

Overall we could say it's a good start as we were able to assist the young minds in a progressive path which was our main motto. Need to look into hosting the Knowledge sharing sessions on works that would help them along.

Team Details:

Student Coordinators

		
Priya Bhavana Uppalapati	Srimanth Reddy Ummenthala	Satya Mohanth Mane

Faculty Coordinators

	
<p>Y. Bhanusree</p>	<p>Dr Chalumuru Suresh</p>
