teamwork or games, VNRVJIET FINISHING SCHOOL promises an experience that will build the foundation for a fulfilling life. It offers a comprehensive course that prepares students for the toughest exams and for life. At VNRVJIET FINISHING SCHOOL the focus remains on enhancing technical skills, and sharpening the personal, social and professional domain in order to bridge the gap between education and industry.

Although the demand for technical graduates is increasing the employability of the students passing out from various technical institutes is very low. With a view to meet the immediate trained human resource requirements of the industries, VNRVJIET has taken up an initiative to setup a finishing school for engineering graduates. So, this program has been devised with **objectives** of:-

- Helping young graduates to find Jobs through appropriate training
- Preparing students to secure admission in world class Universities for higher studies
