# VALLURUPALLI NAGESWARA RAO VIGNANA JYOTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY

An Autonomous, ISO 9001:2015 & QS I-Gauge Diamond Rated Institute, Accredited by NAAC with 'A++' Grade  
NBA Accreditation for B.Tech. - CE, EEE, ME, ECE, CSE, EIE, IT, AME Programmes and  
M.Tech. - STRE, PE, AMS, SWE Programmes  
Approved by AICTE, New Delhi, Affiliated to JNTUH, NIRF 135<sup>th</sup> Rank in Engineering Category  
Recognized as "College with Potential for Excellence" by UGC  
Vignana Jyothi Nagar, Pragathi Nagar, Nizampet (S.O), Hyderabad - 500 090, TS, India.  
Telephone No: 040-2304 2758/59/60, Fax: 040-23042761  
E-mail: postbox@vnrviuet.ac.in, Website: www.vnrviuet.ac.in

## ACADEMIC SECTION

VNR VJIET/ACADEMICS/2022-2023/C004

Date: 08.07.2022

### CIRCULAR

Sub: **Online selection of Open Elective – I and Professional Elective – I courses of B. Tech. V semester (III year I semester) through EDUPRIME software – Reg.**

All the HODs are requested to inform and direct **B. Tech. IV semester** students **[R19-2020 Admitted]** to perform selection of elective courses through EDUPRIME software as per the schedule given below.

Activity	Date & Time
Selection of Open Elective – I and Professional Elective – I courses of <b>B.Tech. V semester</b> by B.Tech. II year students	<b>14.07.2022 (01.00 p.m.)</b> to <b>15.07.2022 (07.00 p.m.)</b>

B. Tech. II year students can perform this activity by logging to their respective login accounts in EDUPRIME software through the following address:

<http://automation.vnrviuet.ac.in/EduPrime2>

You are also requested to inform all the students to **ENSURE THAT THEIR EDUPRIME ACCOUNTS ARE UNLOCKED & PASSWORD PROTECTED. ALSO INFORM THEM NOT TO DISCLOSE THEIR EDUPRIME ACCOUNT PASSWORDS TO ANYONE.**

**Detailed instruction sheet** containing the guidelines for performing this activity and **list of courses on offer in V semester** is attached to this circular and shall be also available in the Institute website and student login account in EDUPRIME software.

  
Dr. Y. Shivraj Narayan  
Co-ordinator, Academics

  
Dr. K. Anuradha  
Dean, Academics

#### Copy to:

- Principal for information
- CAMS
- All HODs – with a request to circulate among B.Tech. VI semester students and also to visit Institute Website for more information

# INSTRUCTIONS TO THE STUDENTS FOR ELECTIVE COURSE SELECTION

## NOTE:

**STUDENTS MUST PROTECT THEIR LOGIN ACCOUNTS BY CHANGING THE ACCOUNT PASSWORDS (UNIQUE) AND NOT TO DISCLOSE IT TO ANYONE.**

Students must note that the elective course selection is based on **FIRST-COME FIRST-SERVE** basis.

1. Students are advised to go through the syllabus of the open elective and professional elective courses available in the Institute website before selecting the elective course.
2. Students must login to their account by entering 'Username' and 'Password' in Eduprime Software through the following link:  
<https://automation.vnrvjiet.ac.in/EduPrime2>
3. Click on 'Student' in the left panel followed by 'Student Elective'. Screen titled 'Elective Course Management' containing Elective course groups would appear. Click on the edit button on the left of elective course group name.

Elective Course Management

Elective	Course Allotted	Status
R19 Open Elective-II		
R19 ME Professional Elective II		

AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20

4. Pop-up containing detailed instructions would appear. Read the instructions carefully and then click on 'Proceed'.
5. A screen containing the list of either open elective courses or professional elective courses depending upon the elective group selected will be displayed. This screen consist of 6 columns.

Elective Course Management

AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20

Course [ Track ]	Maximum number of seats in course	Number of seats allotted	Number of seats available	Select your preferred course	Status
19OE1HS02 - ENTREPRENEURSHIP [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1EC09 - EMBEDDED SYSTEMS FOR IOT [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1IT08 - FUNDAMENTALS OF CYBER SECURITY [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1IT09 - FUNDAMENTALS OF DATA SCIENCE [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1AE05 - INTRODUCTION TO ADVANCED VEHICLE TECHNOLOGIES [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed

Save Freeze Close

- First column indicates the **names of courses on offer**.
  - Second column indicates the **maximum number of seats in each course**.
  - Third column indicates the **number of seats already allotted** to the students.
  - Fourth column indicates the **number of seats now available**.
  - Fifth column provides the option of **selecting your preferred course**. Students are advised that the elective course which they would like to study must be selected by selecting in this column.
  - Sixth and last column indicates the **status of course** selected.
6. Status of course: There are 3 statuses for an elective course.
    - i) **Course not yet confirmed**: It means the **number of students selecting an elective course is less than 20 hence the course will not be run during the semester**. Such students will have to choose another elective course.
    - ii) **Course is confirmed**: It means the **number of students selecting an elective course is equal to or more than 20 hence the course will be run during the semester**.
    - iii) **Seats are not available**: It means the **maximum number of seats defined for an elective course are exhausted or over**. Students will not be able to choose such courses and shall select another course of their choice.

## OPEN ELECTIVE COURSES

### OPEN ELECTIVE TRACK BASED CATEGORY:

7. Students who want to pursue an OE Course based on Open Elective Track in V semester shall be able to see the following screen consisting of Level-1 course defined in V semester. After selection of the displayed open elective course, press **Save**.

8.

Elective Course Management					
AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20					
Course [ Track ]	Maximum number of seats in course	Number of seats allotted	Number of seats available	Select your preferred course	Status
19OE1AE02 - MODERN AUTOMOTIVE TECHNOLOGIES [ Autonomous Vehicles ]	3	0	3	<input checked="" type="checkbox"/>	Course not yet confirmed

9. A message regarding confirmation of selection would appear on screen. Press **Yes**.

!

**Are you sure?**

Do you want to confirm the selected course?

10. Click on **Freeze** button for course confirmation.

Elective Course Management					
AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20					
Course [ Track ]	Maximum number of seats in course	Number of seats allotted	Number of seats available	Select your preferred course	Status
19OE1AE02 - MODERN AUTOMOTIVE TECHNOLOGIES [ Autonomous Vehicles ]	3	0	3	<input checked="" type="checkbox"/>	Course not yet confirmed

11. A message regarding confirmation of selection would appear on screen, then press **Yes**.

!

**Are you sure?**

Do you want to submit the selected course? This cannot be changed once submitted.

12. Upon pressing 'Close' button displayed on the screen, student would be taken back to the first screen wherein against the open elective group name, title of the open elective course selected by the student would be shown along with the status of course.

Elective Course Management		
Elective	Course Allotted	Status
<input type="radio"/> R19 Open Elective-II	19OE1AE02 - MODERN AUTOMOTIVE TECHNOLOGIES [ Autonomous Vehicles ]	Course is confirmed
<input type="radio"/> R19 ME Professional Elective II		

AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20

**OPEN ELECTIVE GENERAL POOL BASED CATEGORY:**

13. Students who want to pursue an OE Course from General Pool in V semester shall be able to see the screen consisting of General Pool Courses offered in V semester as shown below. After selection of an open elective course of your choice, press **Save**.

AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20					
Course [ Track ]	Maximum number of seats in course	Number of seats allotted	Number of seats available	Select your preferred course	Status
19OE1HS02 - ENTREPRENEURSHIP [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1EC09 - EMBEDDED SYSTEMS FOR IOT [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1IT08 - FUNDAMENTALS OF CYBER SECURITY [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1IT09 - FUNDAMENTALS OF DATA SCIENCE [ General ]	3	0	3	<input checked="" type="checkbox"/>	Course not yet confirmed
19OE1AE05 - INTRODUCTION TO ADVANCED VEHICLE TECHNOLOGIES [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed

Buttons: Save, Freeze, Close

14. A message regarding confirmation of selection would appear on screen. If the student is satisfied with his / her choice, press **Yes**, otherwise press **Cancel** and make selection of another open elective course.

Are you sure?  
Do you want to confirm the selected course?

Buttons: Cancel, Yes

15. If the student is satisfied with the selected open elective course then click on **Freeze** button for course confirmation.

AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20					
Course [ Track ]	Maximum number of seats in course	Number of seats allotted	Number of seats available	Select your preferred course	Status
19OE1HS02 - ENTREPRENEURSHIP [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1EC09 - EMBEDDED SYSTEMS FOR IOT [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1IT08 - FUNDAMENTALS OF CYBER SECURITY [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed
19OE1IT09 - FUNDAMENTALS OF DATA SCIENCE [ General ]	3	0	3	<input checked="" type="checkbox"/>	Course not yet confirmed
19OE1AE05 - INTRODUCTION TO ADVANCED VEHICLE TECHNOLOGIES [ General ]	3	0	3	<input type="checkbox"/>	Course not yet confirmed

Buttons: Save, Freeze, Close

16. A message regarding confirmation of selection would appear on screen. If the student is satisfied with his / her choice, press **Yes**, otherwise press **Cancel** and make selection of another open elective course.

Are you sure?  
Do you want to submit the selected course? This cannot be changed once submitted.

Buttons: Cancel, Yes

17. Upon pressing '**Close**' button displayed on the screen, student would be taken back to the first screen wherein against the open elective group name, title of the elective course selected by the student would be shown along with the status of course.

Elective	Course Allotted	Status
R19 Open Elective-II	19OE1IT09 – FUNDAMENTALS OF DATA SCIENCE [ General ]	Course is confirmed
R19 ME Professional Elective II		

AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20

# PROFESSIONAL ELECTIVE COURSES

## 18. PROFESSIONAL ELECTIVE GROUP:

In the screen titled 'Elective Course Management' containing Open Elective and Professional Elective course group, Click on the **edit** button on the left of Professional Elective course group name.

19. Pop-up containing **detailed instructions** would appear. Read the instructions carefully and then click on '**Proceed**'.

20. A screen containing the list of Professional Elective courses will be displayed.

21. After selection of professional elective course of your choice, press **Save**.

22. A message regarding confirmation of selection would appear on screen. If the student is satisfied with his / her choice, press **Yes**, otherwise press **Cancel** and make selection of another professional elective course.

23. If the student is satisfied with the selected professional elective course then click on **Freeze** button for course confirmation.

24. A message regarding confirmation of selection would appear on screen. If the student is satisfied with his / her choice, press **Yes**, otherwise press **Cancel** and make selection of another professional elective course.

25. Upon pressing 'Close' button displayed on the screen, student would be taken back to the first screen wherein against the Professional Elective group name, title of the elective course selected by the student would be shown along with the status of course.

Elective	Course Allotted	Status
<input type="radio"/> R19 Open Elective-II	19OE1AE02 - MODERN AUTOMOTIVE TECHNOLOGIES [Autonomous Vehicles]	Course is confirmed
<input type="radio"/> R19 ME Professional Elective II	19PE1ME08 - UNCONVENTIONAL MACHINING PROCESSES	Course not yet confirmed

**AN ELECTIVE COURSE SHALL BE CONFIRMED IF AND ONLY IF THE TOTAL 'NUMBER OF STUDENTS ALLOTTED' REACHES 20**

**NOTE:**

- (i) FOR AN ELECTIVE COURSE TO BE ALLOTTED, IT IS **COMPULSORY** TO SAVE THE SELECTED COURSE BY **PRESSING 'SAVE'** AND FOLLOWED BY FREEZING THE CHOICE BY **PRESSING 'FREEZE'**.
- (ii) **STUDENT WILL NOT BE ABLE TO CHANGE HIS / HER SELECTION OF COURSE(S) UPON PRESSING 'FREEZE' BUTTON.**

**IF THE COURSE IS NOT FROZEN, THEN THAT COURSE SHALL NOT BE ALLOTTED.**

26. A student can change his/her selection of **Professional Elective course / Open Elective General Pool** course any number of times during the time the elective selection window is open, *provided the student has not frozen his course*. Note that if the preferred elective course is already **FREEZED** through '**FREEZE**' button, then student will not be able to change his/her selection of course.
27. As the elective course selection is dynamic in nature, status of course may change at any point of time depending upon selection of elective courses by the students. Hence, **STUDENTS ARE ADVISED TO CHECK THE STATUS OF THE ELECTIVE COURSE SELECTED BY THEM ON THE CLOSING DATE OF ELECTIVE SELECTION WINDOW.**
28. **If the status changes from 'confirmed' to 'not confirmed', student may opt for another elective course of his/her choice on the last date.**
29. **If a student does not perform this activity during the elective selection window, then the student shall be allotted an elective course by the concerned HoD.** For such students, a message regarding non-selection of elective course shall be displayed in the student login dashboard.
30. A student may select / change his / her Professional Elective course / Open Elective General Pool course (**only if not frozen**) upto the closing date of the window.
31. **ONLINE SELECTION OF PROFESSIONAL ELECTIVE COURSE IN EDUPRIME SOFTWARE BY A STUDENT WHO HAS OPTED FOR PURSUING PROFESSIONAL ELECTIVE COURSE THROUGH NPTEL-SWAYAM PLATFORM SHALL NOT BE CONSIDERED.**

**DO NOT FORGET TO PRESS 'SAVE' & 'FREEZE' BUTTONS UPON FINALIZED SELECTION OF ELECTIVE COURSES**

### VNR VIGNANA JYOTHI INSTITUTE OF ENGINEERING & TECHNOLOGY

An Autonomous, ISO 9001:2015 & QS I-Gauge Diamond Rated Institute,  
Accredited by NAAC with 'A++' Grade  
NBA Accreditation for CE, EEE, ME, ECE, CSE, EIE, IT B.Tech. Programmes  
Approved by AICTE, New Delhi, Affiliated to JNTUH,  
NIRF 135<sup>th</sup> Rank in Engineering Category  
Recognized as "College with Potential for Excellence" by UGC  
Vignana Jyothi Nagar, Pragathi Nagar, Nizampet (S.O),  
Hyderabad – 500 090, Telangana, India

## **CONTENTS:**

❖ **INSTRUCTIONS REGARDING OPEN ELECTIVES**

❖ **OPEN ELECTIVE TRACKS – MEZZANINE TECHNOLOGIES**

❖ **GENERAL POOL OF OPEN ELECTIVE COURSES**

❖ **SYLLABI OF V SEMESTER OPEN ELECTIVE COURSES**

## VNRVJIET B.TECH. R19 ACADEMIC REGULATION :: OPEN ELECTIVE COURSES

### :: PLEASE READ THE INSTRUCTIONS CAREFULLY ::

1. All the students of B.Tech. programmes under R19 academic regulation are informed that there are a total of **four Open-Elective (OE) courses to be studied** by them **one each in V, VI, VII and VIII semester**.
2. A student needs to select and pursue one open-elective course of his/her choice in each semester.
3. These courses are designed and grouped as **specialized tracks based on emerging technologies** called as "**Mezzanine Technologies**".
4. There are a total of **12 OE tracks based on Mezzanine Technologies** in the curriculum i.e.,
  - i) Smart Cities
  - ii) Waste Management
  - iii) Green Energy
  - iv) 3D Printing & Design
  - v) Internet of Things
  - vi) Augmented Reality (AR) / Virtual Reality (VR)
  - vii) Artificial Intelligence
  - viii) Blockchain Technologies
  - ix) Robotics
  - x) Cyber Security
  - xi) Data Sciences / Big Data & Analytics
  - xii) Autonomous Vehicles
5. Each **OE track based on a Mezzanine Technology** shall have **four courses**, one placed in each semester i.e., one each in V, VI, VII and VIII semester respectively as shown below.

	V semester	VI semester	VII semester	VIII semester
Name of the OE Track	Level 1 Course	Level 2 Course	Level 3 Course	Level 4 Course

**In order to pursue a level 2 course, student is expected to complete level 1 course as the pre-requisite.**

6. Apart from the above mentioned **12 OE tracks** based on Mezzanine Technologies and the courses in it, there is a '**General Pool**' of open-elective courses consisting of **mixed and independent courses without any pre-requisites**.
7.  **Courses to be offered from 'General Pool' in each semester shall be decided by the Institute** well before the selection of elective courses by the students. **Courses from the 'General Pool' may be offered multiple times depending upon the need.**
8.  A student **before joining V semester** may **opt to study EITHER open-elective course that is based on a Mezzanine Technology track OR an open-elective course from General pool.**

9. A student completing all the 4 open-elective courses (Level 1 to Level 4) from the chosen single Mezzanine Technology track successfully, as mentioned in the R19 Academic Regulation, shall be awarded a separate **PROFICIENCY CERTIFICATE IN THAT SPECIALIZED TECHNOLOGY** from the Institute.

**Ex. B.Tech. (Mechanical Engineering) with Proficiency in “Internet of Things”**

10. By default, an open-elective course from a specialized OE track selected by the student in V semester shall be his / her preferred OE track for the remaining 3 semesters. It shall be deemed that the student is willing to continue to study the remaining 3 OE courses (level 2, 3 & 4) from the same track in the subsequent semesters unless the student wishes to exit from the track and opt for another OE track or course from General pool. Those students who would like to go for change of OE track need to submit a request in writing to Dean, Academic through HoD.
11. Students dropping out of the OE track may **opt to choose and pursue a course either from the General pool OR from any other OE track subjected to the offering and availability of seats of that OE track/course in semester.**
- a) In the event of student selecting a course from other **OE track** for studying in VI or VII semester, it shall be **the responsibility of the student to fulfill the eligibility conditions (pre-requisite courses) to pursue that course.**
- b) That is the student shall **complete all the pre-requisite courses on his/her own through MOOC offered by SWAYAM-NPTEL (courses that are atleast 80% equivalent – as decided by the respective Chairman, BoS and Dean, Academic)** prior to the start of semester in which the course is to be studied.
- c) Student shall **produce a documentary evidence** in support of this claim to the Dean, Academic to become eligible for taking the course. In case of the **pre-requisite course not on offer in the MOOC platforms, the fulfillment of pre-requisite courses shall be decided through a Diagnostic test** conducted by the parent department offering the course. A student completing the diagnostic test successfully shall be deemed to have met the pre-requisite courses criteria and shall be **allowed to change the OE track depending upon offering and availability of seats in that track.**
12. **Changing of an OE track by a student shall be allowed for pursuing OE courses of VI and VII semesters only i.e.,** a student shall be allowed to change the OE track only twice i.e., before the start of VI and VII semesters in the four semester span. However, **this condition shall not be applicable to the students opting for pursuing courses from General pool.**
13. **In the event of a STUDENT COMING OUT OF THE ALREADY CHOSEN OE track in any semester, due to any reason whatsoever, shall FORFEIT THE CLAIM ON THE PROFICIENCY CERTIFICATE.**
14. Open-elective courses offered in General pool may be appended with more number of courses as and when required at the discretion of the Institute and shall be informed well before the selection of electives by the students.
15. **It is informed that only a limited number of elective courses shall be offered for selection at the discretion of the offering department and Institute which shall be **announced well before the start of the next semester.****
16. The list of OE courses under each of the specialized OE tracks is given in next section. For more details please refer to the Institute.

❖ OE TRACKS BASED ON MEZZANINE TECHNOLOGIES:

OE TRACKS (Parent Department)	V SEMESTER	VI SEMESTER	VII SEMESTER	VIII SEMESTER
Smart Cities (CE)	Smart Cities Planning and Development	Green Building Technology	Smart Materials and Structures	Intelligent Transportation System
Waste Management (CE)	Solid Waste Management	Hazardous Waste Management	Waste to Energy	Intelligent Waste Management and Recycling System
Green Energy (EEE)	Renewable Energy sources	Renewable Energy Technologies	Energy Storage Technologies	Energy Management and Conservation
3D Printing & Design (ME)	Elements of CAD	Introduction to 3D Printing	3D Printing - Machines, Tooling & Systems	Reverse Engineering
Internet of Things (ECE)	Sensors Transducers and Actuators	Introduction to Microcontrollers and Interfacing	IoT Protocols and its Applications	Wireless Sensor Networks
Augmented Reality (AR) / Virtual Reality (VR) [ECE]	Introduction to C Sharp	Introduction to Signal Processing	Introduction to Image & Video Processing	Applications of AR & VR
Artificial Intelligence (CSE)	Mathematics for Artificial Intelligence	Fundamentals of Artificial Intelligence	Machine Learning Techniques	Deep Learning
Blockchain Technologies (CSE)	Fundamentals of Computer Networks / Relational Data Base Management Systems	Distributed Databases	Cryptography and Network Security	Blockchain Technology
Robotics (EIE)	Fundamentals of Robotics	Kinematics and Dynamics of Robotics	Drives and Control Systems for Robotics	Robot Programming and Intelligent Control Systems
Cyber Security (IT)	Fundamentals of Computer Networks / Relational Data Base Management Systems	Cryptography & Network Security	Essentials of Cyber Security	Computer Forensics
Data Sciences / Big Data & Analytics (IT)	Statistical Methods for Data Science	Computational Thinking using Python	Fundamentals of Data Mining	Data Analysis and Visualization
Autonomous Vehicles (AME)	Principles of Automobile Engineering	Modern Automotive Technologies	Electric, Hybrid and Fuel Cell Vehicles	Connected and Autonomous Vehicles

❖ **GENERAL POOL OF OE COURSES:**

General - Computing (CSE / IT)	<ul style="list-style-type: none"> <li>• <b>Programming through Java</b></li> <li>• <b>Relational Data Base Management Systems</b></li> <li>• <b>Computational Thinking using Python</b></li> <li>• Introduction to Data Analytics</li> <li>• Fundamentals of Computer Algorithms</li> </ul>
General (H&S)	<ul style="list-style-type: none"> <li>• <b>Professional Ethics &amp; Human Values</b></li> <li>• Entrepreneurship</li> <li>• Personality Development &amp; Public Speaking</li> <li>• Foreign Language (French / German / Spanish)</li> </ul>
General (CE)	<ul style="list-style-type: none"> <li>• <b>Smart Cities</b></li> </ul>
General (EEE)	<ul style="list-style-type: none"> <li>• <b>Trends in Energy Sources for Sustainable Development</b></li> </ul>
General (ME)	<ul style="list-style-type: none"> <li>• <b>3D Printing and Design</b></li> </ul>
General (ECE)	<ul style="list-style-type: none"> <li>• <b>Embedded Systems For IOT</b></li> </ul>
General (CSE)	<ul style="list-style-type: none"> <li>• <b>Artificial Intelligence - A Beginner's Guide</b></li> </ul>
General (CSE)	<ul style="list-style-type: none"> <li>• <b>Blockchain Essentials</b></li> </ul>
General (EIE)	<ul style="list-style-type: none"> <li>• <b>Fundamentals of Robotics and Drones</b></li> </ul>
General (IT)	<ul style="list-style-type: none"> <li>• <b>Fundamentals of Cyber Security</b></li> </ul>
General (IT)	<ul style="list-style-type: none"> <li>• <b>Fundamentals of Data Science</b></li> </ul>
General (AE)	<ul style="list-style-type: none"> <li>• <b>Introduction to Advanced Vehicle Technologies</b></li> </ul>
General (Industry Offered Elective)	<ul style="list-style-type: none"> <li>• <b>Introduction to Application Development with C#</b></li> </ul>
	<ul style="list-style-type: none"> <li>• <b>Introduction to Application Development with Java</b></li> </ul>
	<ul style="list-style-type: none"> <li>• <b>Introduction To Application Development with Python</b></li> </ul>

\* Courses shown in **Green and bold** are on offer

**NOTE:**

- (i) Students belonging to Parent Department shall not be able to select the OE tracks/courses offered by the Parent Department
- (ii) Students are **NOT ALLOWED TO REPEAT COURSES** to be pursued through 'Open Elective' and 'Professional Elective' tracks
- (iii) In case of a student selecting similar course in both open elective or professional elective track, selection of **SUCH COURSE SHALL BE TREATED AS NULL SELECTION.** Student shall then be allotted course based on the available courses. Similarity of the course shall be defined by the respective Chairman, Board of Studies.
- (iv) Courses that are offered under H&S department shall be available for selection to students of all the departments subjected to their offering by the H&S department

**DECISION OF THE INSTITUTE IN OFFERING THE OE COURSES SHALL BE FINAL AND ABIDING.**

Offered by:

**CIVIL ENGINEERING**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
Smart Cities	Smart Cities Planning and Development	Green Building Technology	Smart Materials and Structures	Intelligent Transportation System

## OE TRACK :: SMART CITIES

In the twenty-first century, engineers are being tasked with solving ever more complex and subtle societal challenges – from climate change to unprecedented urbanisation that is materially affecting the lives of many urban populations. As engineers become ever more interdisciplinary and the boundaries of disciplines soften, they need to reflect as a community as to the appropriateness of the engineering paradigm to address these needs. Currently the engineering community is pointing to the digital technologies and the 'smart city' as a deliverer of efficiency and resilience without fully acknowledging the intricate socio-political context in which it is situated.

The domain of EIE was developed to modernise and automate these operations using the technological advancements in the realm of electronics. Even outside the industry, common household appliances — such as washing machine, air-conditioner, geyser, and microwave oven — cannot attract customers without features such as auto cut-off after certain time or temperature, which is again an example of instrumentation. The field of Instrumentation Engineering is also core to the recent advances such as smart home appliances, smart cities and automobiles. It is thus not far from the truth to claim that the fourth industrial revolution.

The world population is continuously growing and reached a significant evolution of the society, where the number of people living in cities surpassed the number of people in rural areas. This puts national and local governments under pressure because the limited resources, such as water, electricity, and transports, must thus be optimized to cover the needs of the citizens. Therefore, different tools, from sensors to processes, service, and artificial intelligence, are used to coordinate the usage of infrastructures and assets of the cities to build the so-called smart cities.

Different definitions and theoretical models of smart cities are given in literature. However, smart city can usually be modelled by a layered architecture, where communication and networking layer plays a central role. In fact, smart city applications lay on collecting field data from different infrastructures and assets, processing these data, taking some intelligent control actions, and sharing information in a secure way. Thus, a two-way reliable communications layer is the basis of smart cities. This chapter introduces the basic concepts of this field and focuses on the role of communication technologies in smart cities. Potential technologies for smart cities are discussed, especially the recent wireless technologies adapted to smart city requirements.

### ***What is the concept of a smart city?***

There is no universally accepted definition for a smart city because people can interpret different meanings for it. Hence, it means different things to different people. Here, you will get a basic definition that captures the essence of what a smart city is and what it does. While the concept varies from area to area depending on the resources, the basic idea behind it remains the same. A smart city aims to bring various components together to live harmoniously and attempts to do with the least environmental damage or impact. In other words, a smart city is a place with high standards of living, which survives and thrives on eco-friendly means. The size and

amenities within a smart city vary according to geography, resources available, geopolitical scenario and investment received.

Growth in Global population continues to drive citizens from rural areas to cities. With rapid expansion of urban areas, cities need to become intelligent to handle this large scale urbanization. This is driving city operators to look at smarter ways to manage complexities, increase efficiencies and improve quality of life. Today we need cities that monitor & integrate infrastructure to better optimize resources while maximizing service to its citizens. So to meet all the needs we need our cities to be smarter which brings a concept "**Smart cities**" Smart cities optimize the use of technology in the design & operation of infrastructure and buildings in such a way which meets the current and future needs of their citizens. To be truly smart they also require consideration of governance & growth, urban development and infrastructure, the environment & natural resources, society and community.

Smart city programs provide a range of technologies that can be applied to solve infrastructure problems associated with ageing infrastructure and increasing demands. The potential for infrastructure and urban improvement remains unrealized, however, due to technical, financial, and social constraints and criticisms that limit the implementation of smart cities concepts for infrastructure management. The discussion presented here provides a review of smart technologies including sensors, crowdsourcing and citizen science, actuators, data transmission, Internet of Things, big data analytics, data visualization, and blockchain, which can be used for infrastructure management. Smart infrastructure programs are reviewed to explore how enabling technologies have been applied across civil engineering domains, including transportation systems, water systems, air quality, energy infrastructure, solid waste management, construction engineering and management, structures, and geotechnical systems.

Making cities "smarter" by efficient management of resources and infrastructure, greener environment, and smart governance resulting in a better quality of living of its citizens. This can be enabled by the effective use of information and communication technologies (ICTs) tools, which have the ability to provide eco-friendly and economically viable solutions for cities.

Setting up a smart city is more than improving the old system with technology by simply adding sensors, remote supervision, and control to essential city services. It should be a complete shift of a paradigm in daily life when using new technologies, especially new ICT leading to smart outcomes.

### **Smart solutions**

Another important feature of smart cities is that they will provide smart solutions to modern problems. These include:

- Public information systems
- Redressal of grievances
- Electronic service delivery
- Maximum engagement of citizens
- Reduced energy and fuel usage
- Reduces the development of wastes
- Smart water monitoring
- Treatment of wastewater
- Sustainable monitoring water quality
- Maximum utilization of renewable energy sources
- Usage of green building techniques
- Smart parking to reduce clutter
- Intelligent traffic management system.

### **Advantages of a smart cities:**

1. Promotion of mixed land usage resulting in higher efficiency and reduced wastage of land.
2. Expanded housing opportunities.
3. Reduced congestion, air pollution and resource depletion.
4. Helps to boost local economies by promoting localized trade and interactions.
5. Efficient use of public transport to reduce fuel wastage.
6. Safe and secure localities.
7. Preservation of open spaces.
8. Reduction in urban heating.
9. Promotion of transit-oriented development.
10. Making governance more people-friendly and cost-effective.

Here's a look at some projects that have taken inspiration from the concepts used for the design of smart cities. These projects will help you build energy-efficient systems that will help heal the world.

1. **Home Automation using IoT**
2. **Smart Irrigation System**
3. **Smart Building using IoT**
4. **Smart Energy Meter using GSM**
5. **Solar and Smart Energy Systems**
6. **Smart Water Monitoring**
7. **Automated Street Lighting**
8. **Automated Railway Crossing**
9. **Intelligent Transportation Systems**
10. **Smart Sewage Maintenance Systems.**

To develop new smart cities and to transform our cities into smart cities the engineers in particular are stepping up as leaders.

**Civil & Environmental Engineers** are working to harness the potential of latest technologies and data for our urban infrastructure, which is among the most complex system in the world. They provide sustainable, resilient and advanced means of

transportation system, green building, better water management system and better waste management system. This not only develop physical infrastructure but also develop institutional & social infrastructure that enable our societies to function. Modelling these systems of systems will require managing data at an unprecedented scale.

To support them Computer and **Electronics & Communication Engineers** help in creating future cities that are digital, build and operate cities ICT landscape across application and infrastructure like IOT (Internet of Things), e-payment, e-market, the latest communication devices etc which is leveraging next generation technologies. They create a platform for conveyance of different city services, leverage big data analytics to manage city performance and proactive crisis management.

**Electrical Engineers** developing new renewable source of energy to meet ever increasing power demands. They also develop methods of effective power transmission with minimum losses which is more economical and safer. They also work on developing microchips to micro sensors which are helping in making our households, institution efficient and safer.

### **Conclusion:**

By going through above article, it is clear that Dreaming of a smart city without active contribution of engineers is a myth. So, there will always be demand of Engineers and because of which even after crises in the placement scenario still the maximum science students choose Engineering as their first career choice in hope of a better future.

<b>3</b>	<b>0</b>	<b>3</b>

**(19OE1CE01) SMART CITIES PLANNING AND DEVELOPMENT  
(Open Elective-I)**

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To Introduce students on smart city basic concepts, global standards and Indian context of smart cities
- To understand smart community, smart transportation and smart buildings
- To understand Energy demand, Green approach to meet Energy demand and their capacities
- To identify Smart Transportation Technologies in cities and concepts towards smart city

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Recognize smart city concepts and their international and national standards

**CO-2:** Recognize smart community, transportation and building concepts

**CO-3:** Develop and calibrate energy demand and their capacity limits

**CO-4:** Predict the various smart urban transportation systems and the transition from existing city towards a smart city

**UNIT – I:**

**Introduction to Smart Urban Infrastructures and Smart Cities:** Introduction to City Planning - Understanding Smart Cities - Dimensions of Smart Cities - Global Experience of Smart Cities – Global Standards and Performance Benchmarks, Practice Codes - Indian scenario - India “100 Smart Cities” Policy and Mission.

**UNIT – II:**

**Smart Cities Planning and Development:** Introduction to Smart Community - Smart community concepts: Concept of Smart Community - Smart Transportation - Smart Building and Home Device - Smart Health - Smart Government - Smart Energy and Water – Cyber Security, Safety, and Privacy - Internet of Things, Blockchain, Artificial Intelligence, Alternate Reality, Virtual Reality.

**UNIT – III**

**Smart Urban Energy Systems – I:** Conventional vs. Smart, City components, Energy demand, Green approach to meet Energy demand, Index of Indian cities towards smartness – a statistical analysis -Meeting energy demand through direct and indirect solar resources - Efficiency of indirect solar resources and its utility, Capacity limit for the indirect solar resources - Effectiveness in responsive environment in smart city; Smart communication using green resources.

**UNIT – IV:**

**Smart Urban Energy Systems – II:** Introduction to PV technology - PV of various scale for smart city applications - Energy efficiency - Policies of Solar PV in smart domains (RPO, REC, Carbon credit, etc.) Definition, Structure of Smart Grid- Indian Perspective- Advantage & limitation.

**UNIT – V:**

**Smart Urban Transportation Systems:** Smart Transportation Technologies - Driverless and connected vehicles - Ride sharing solutions - The "improve" pathway - The "shift" pathway – Smart Roads and Pavement systems.

**UNIT – VI:**

**Towards Smart Cities:** The transition of legacy cities to Smart -. Right transition process - The benefit of citizens, cities to adopt effective management and governance approaches - Factors in the transition phase of legacy cities to smart cities and their managerial implications.

## WASTE MANAGEMENT

Offered by:

**CIVIL ENGINEERING**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
Waste Management	Solid Waste Management	Hazardous Waste Management	Waste to Energy	Intelligent Waste Management and Recycling System

## **OE TRACK :: WASTE MANAGEMENT**

The courses such as solid waste management (SWM), hazardous waste management (HWM), waste to energy (WTE) and intelligent waste management and recycling system (IWM&RS) are the courses available in the waste management track stream which having a potential syllabus content to meet out the industrial and research needs. Solid waste management is an interesting track course which actual highlights the day-to-day problems where everybody is facing due to the improper management of industrial, domestic and household waste. Further, the enthusiastic aspects involved in the track courses such as: awareness on its impact over on environment, formal or scientific way of handling and management of waste and disposal scenarios.

In hazardous waste management course, handling and management of nuclear waste at national and international level have been highlighted. Further, the content enlightens about the legal process of state, central and industrial responses toward any emergency situations arise by hazardous waste. Finally, it deals about natural resource damage assessment and restoration.

Waste to energy is a pioneering course available in the track; it is one of the interesting and mindboggling course in the track which highlights the importance of converting the waste materials into wealth. It gives enough space to understand the basic process technologies in a theoretical and industrial way such as: thermal, chemical and biological conversion process. From the above, biological conversion process is in its embryonic state and having potential to expands its technological wings in the near future and having enormous scope of industrial applications where students can be benefited. Finally, conversion devices is an innovative module have been framed to explore the young minds in the line of designing and creating a demand based conversion device products which even lays an entrepreneurial pathway to them.

First of its kind, even at both international and national level a dedicated and extensive course for intelligent waste management and recycling system have been framed with conventional and advanced modules. It is really an interesting course where a student can apply his/her innovative creations to solve the existing and futuristic problems in a smart way with the help of smart tools. Optimistic modules such as: life cycle assessment and carbon-footprint-based IWMS, principles of systems engineering and regulatory frameworks have been incorporated to meet out the international requirements.

In the pathway of exploring the fundamentals and basic knowledges about the course, the six units of all the courses have been formulated keeping in the mind that the students can be able to competitive among the international community at the end of semester. In this context, comprehensive theoretical and industrial processes have been incorporated in each and every module of courses. Further, it is highly believed that the framed syllabus modules having 100% industrial applications which can make the students to feel motivated, satisfied and confidence to compete with the international community.

### (19OE1CE05) SOLID WASTE MANAGEMENT (Open Elective-I)

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the concepts of solid waste management
- To remember the characteristics of solid waste and source reduction techniques
- To acquire the knowledge & skills in the collection, storage, transport and engineering principles of solid waste
- To remember and understand the treatment, disposal and recycling and various laws and regulation of solid waste management

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Apply the fundamental concepts of solid waste management

**CO-2:** Apply the acquired knowledge to resolve the practical problems on source reduction

**CO-3:** Apply the knowledge on collection, storage, transport and waste processing of solid waste in real time situation

**CO-4:** Impart the gained knowledge and skills and various laws & regulations on treatment of SW in real time societal problems

**UNIT – I:**

**Sources and Classification:** Types and Sources of solid and hazardous wastes - Need for solid and hazardous waste management – Elements of integrated waste management and roles of stakeholders - Financing and Public Private Participation for waste management- Integrated solid waste management.

**UNIT – II:**

**Waste Characterization and Source Reduction:** Waste generation rates and variation - Composition, physical, chemical and biological properties of solid wastes – Hazardous Characteristics – TCLP tests – waste sampling and characterization plan - Source reduction of wastes –Waste exchange - Extended producer responsibility - Recycling and reuse.

**UNIT – III:**

**Storage, Collection and Transport of Wastes:** Handling and segregation of wastes at source – storage and collection of municipal solid wastes – Analysis of Collection systems - Need for transfer and transport – Transfer stations Optimizing waste allocation– compatibility, storage, labeling and handling of hazardous wastes – hazardous waste manifests and transport.

**UNIT – IV:**

**Waste Processing Technologies:** Objectives of waste processing – material separation and processing technologies – biological and chemical conversion technologies – methods and controls of Composting - thermal conversion technologies and energy recovery – incineration – solidification and stabilization of hazardous wastes-treatment of biomedical wastes - Health considerations in the context of operation of facilities.

**UNIT – V:**

**Waste Disposal:** Waste disposal options – Disposal in landfills - Landfill Classification, types and methods – site selection - design and operation of sanitary landfills, secure landfills and landfill bioreactors – leachate and landfill gas management – landfill closure and environmental monitoring – Rehabilitation of open dumps-remediation of contaminated sites.

**UNIT – VI:**

**Regulatory Frameworks:** Salient features of Indian legislations on management and handling of municipal solid wastes, hazardous wastes, biomedical wastes, nuclear wastes - lead acid batteries, electronic wastes, plastics waste, bio-medical waste, construction and demolition waste and fly ash waste.

**TEXT BOOKS:**

1. Integrated Solid Waste Management, George Tchobanoglous, Hilary Theisen and Samuel A, Vigil, Mc-Graw Hill International edition, New York, 1993
2. CPHEEO, Manual on Municipal Solid Waste Management, Central Public Health and Environmental Engineering Organization, Government of India, New Delhi, 2014

**REFERENCES:**

**GREEN ENERGY**

Offered by:

**ELECTRICAL AND  
ELECTRONICS ENGINEERING**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
<b>Green Energy</b>	<b>Renewable Energy Sources</b>	Renewable Energy Technologies	Energy Storage Technologies	Energy Management and Conservation

## OE TRACK :: GREEN ENERGY

### RENEWABLE ENERGY SOURCES:

#### What we are studying?

The climate landscape is changing rapidly, and new technologies and solutions keep arising to respond to global and local challenges.

Renewable energy sources course makes you discover how Solar Thermal Energy conversion system works. It makes you understand how a Solar Photo voltaic generation system generates electricity. Scope of the course also includes wind energy generation. It also navigates you through Biomass and geothermal energy generation systems.

#### Job opportunities:

When it comes to the hottest and most buzzing careers in the 21st century, the majority of people think of hardcore technical domains such as data science, machine learning & artificial intelligence. Few people might also come up with biotechnology (or biosciences). But, quite often people forget about one of the dark horses – the Renewable Energy sector. Even Bill Gates lobbied for the Energy sector as one of the top three career choices for making an impactful career.

### RENEWABLE ENERGY TECHNOLOGIES:

Within crisis there are seeds of opportunity..! We are at the wedge of fossil fuel end. After few years you can witness fuel crisis all over the world, as an engineer one must aware of the solution. To design sustainable systems those last for decades, one must use renewable energy as main or auxiliary source of energy. The application may be electrical or mechanical or chemical, one must convert energy from renewable source into electricity for ease of use.

Renewable Energy Technologies course will introduce you to Different types of Solar PV systems and their characteristics. Students will know the functionality of Power Converters such as Inverters etc., through block diagram approach. Fuel cell technology, which is one of the solutions for energy crisis will be discussed in detail. Course will conclude by discussing impact of PV panel production on environment and disposal of it.

#### Job Opportunities:

Green jobs in the renewable energy sector are expected to touch new figures with 6 digit monthly income. Following link may describe the interesting interdisciplinary careers for budding engineers.

### ENERGY STORAGE TECHNOLOGIES

Battery technology is an essential skill for every engineer in present scenario. Course on energy storage technologies will enable student to, Design storage system Residential loads integrated to Renewable and storage systems for Electric Vehicles. It will make student to understand various electrochemical storages such as Lead

acid, Li Ion cell etc. and their characteristics. The course enables student to compare non electric, electric storage systems and analyze application of them to various domains.

**Job opportunities:**

Upon successful completion of course student will enhance the chances of getting into EV industry , which almost open fact. Job Profiles include

- i. Battery algorithms engineer
- ii. Battery management engineer
- iii. Battery modeling expert
- iv. Design engineer – EV

**ENERGY MANAGEMENT AND CONSERVATION**

Energy Management And Conservation course is mainly intended to monitor Energy consumption of industries and to manage energy systems. This course also deals with methods of improving efficiency of electric machinery and to design a good illumination system. It also teaches student calculate pay back periods for energy saving equipment.

(19OE1EE01) RENEWABLE ENERGY SOURCES  
(Open Elective-I)

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the role of solar power
- To know components of PV system conversion
- To learn Operation of windmills
- To understand the principle operation of biomass and geo thermal energy systems

**COURSE OUT COMES:** After completion of the course, the student should be able to

**CO-1:** Understand Solar Thermal Energy conversion systems

**CO-2:** Understand Solar Photo voltaic systems

**CO-3:** Analyze wind energy conversion system

**CO-4:** Understand the principle operation of Biomass and geo thermal energy systems

**UNIT – I:**

**Principles of Solar Radiation:** Role and potential of new and renewable source, the solar energy option, Environmental impact of solar power, physics of the sun, The apparent motion of the sun, the solar constant, extraterrestrial and terrestrial solar radiation, solar radiation on tilted surface, instruments for measuring solar radiation and sunshine, solar radiation data.

**UNIT – II:**

**Solar Thermal Energy Conversion:**

**Solar Heating:** Some basic calculations, The performance of solar heating devices, Evaluation of sunlight received by a collector, Flat solar panels - Different technologies of thermal solar collectors-Evaluation of the performance of solar collectors- Selective coatings for collectors and glazing, Solar heating systems -Individual and collective solar water heaters- Combined solar systems for the heating of buildings

**Power Stations:** Concentric Solar Power Plants- Concentrating systems- Components for production of heat and conversion into electricity

**UNIT – III:**

**Solar PV Conversion:** The PV Cell-Crystalline Solar cells-Thin film solar cell, Module, Array, Equivalent Electrical circuit, Open circuit voltage and Short circuit current, I-V, P-V Curves, Array design- Sun angle- effect of Temperature-Sun tracking, PV system components

**UNIT – IV:**

**Wind Energy:** Sources and potentials, horizontal and vertical axis windmills, performance characteristics, Betz criteria, Maximum power Tracking of wind mills, and peak power operation Site selection of Wind mills, working Induction generator (Principle only)

**UNIT – V:**

**Bio-Mass:** Principles of Bio-Conversion, Anaerobic/aerobic digestion, types of Bio-gas digesters, gas yield of bio-gas, utilization for cooking, I.C. Engine operation and economic aspects.

**UNIT – VI:**

**Geothermal & Ocean Energy:** Resources, types of wells, methods of harnessing the energy (brief discussion) potential in India. OTEC, Principles utilization, setting of OTEC plants, thermodynamic cycles. Tidal and wave energy: Potential and conversion techniques, mini-hydel power plants, and their economics.

**TEXT BOOKS:**

**3D PRINTING AND DESIGN**

Offered by:

**MECHANICAL ENGINEERING**

Courses in the OE Track:

OE Tracks	<b>V Sem (OE-I)</b>	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
<b>3D Printing and Design</b>	<b>Elements of CAD</b>	Introduction to 3D Printing	3D Printing - Machines, Tooling & Systems	Reverse Engineering

## **OE TRACK :: 3D PRINTING AND DESIGN**

3D Printing is a process for making a physical object from a three-dimensional digital model by laying down many successive thin layers of a material. It brings a digital CAD model into its physical form by adding layer by layer of materials. Thus called 'Additive Manufacturing'. It is the opposite of subtractive manufacturing i.e., removing material from an object using a mechanical machine. It enables to produce complex shapes using less material than traditional manufacturing methods. There are several different techniques to 3D print an object. It saves time through prototyping and is also responsible for manufacturing impossible shapes. Due to these, it has many applications in different fields like consumer products (eyewear, footwear, design, furniture, industrial products (manufacturing tools, prototypes, functional end-use parts, dental products, prosthetics, architectural scale models, reconstructing fossils, replicating ancient artefacts, reconstructing evidence in forensic pathology etc.

3D printing has good prospects from career perspective. Various positions that could be available are CAD designers, engineers, technical developers, software developers, electronics engineers, etc.

This OE track consists of 04 courses and is designed with an objective to provide an overview of all the constituents of 3D Printing starting from elements of CAD that are needed to create CAD models, followed by basics of 3D Printing required for setting the parameters, then the machines and tools used in 3D Printing for thorough understanding of systems and processes and finally the reverse engineering of 3D printing models from actual objects.

(19OE1ME01) ELEMENTS OF CAD

(Open Elective-I)

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the basics of CAD and devices used
- To know the various types of modeling used in CAD
- To appreciate the concept of feature-based modeling and geometric transformations
- To comprehend the assembly modeling procedure and data exchange formats

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Know the fundamentals of CAD and devices used

**CO-2:** Identify the types of CAD modeling techniques and utilize them

**CO-3:** Evaluate the objects or models using geometric transformations and manipulations

**CO-4:** Perform the assembly modeling and assess the various data exchange formats

**UNIT – I:**

**Fundamentals of CAD:** Introduction to Computer Aided Design (CAD), Design process, Application of computers for Design and Manufacturing, Benefits of CAD, Brief overview of computer peripherals for CAD.

**UNIT – II:**

**Geometric Modeling:** Introduction to Geometric Model, Types of modeling, Curve representation

**Wireframe Modeling:** Introduction, advantages, limitations and applications, Wire frame entities-analytic and synthetic, Basic definitions of Cubic, Bezier and B-spline curves

**UNIT – III:**

**Surface Modeling:** Introduction, advantages, limitations and applications, surface entities, Basic definitions of analytic surfaces - planar surface, ruled surface, tabulated cylinder, surface of revolution; Basic definitions of synthetic surfaces - Bezier surface, B-spline surface

**UNIT – IV:**

**Solid Modeling:** Introduction, advantages, limitations and applications, Solid Entities, Solid Representation schemes – Boundary Representation (B-Rep) scheme, Constructive Solid Geometry (CSG) scheme.

**Feature-based Modeling:** Introduction, Feature entities, Feature representation, 3D Sketching, Parameter, Relations and Constraints

**UNIT – V:**

**Geometric Transformations:** Introduction to 2D & 3D transformations, Brief treatment on Translation, Scaling, Reflection and Rotation using Homogeneous and concatenated transformations

Manipulations: Displaying, Segmentation, Trimming, Intersection, Projection

**UNIT – VI:**

**Assembly Modeling:** Introduction, Assembly modeling, Assembly Tree, Mating Conditions, Bottom-up and Top-down approach

Product Data Exchange: Introduction, Graphics Standards, Types of translators, Importance of formats in 3D Printing, Data exchange formats - IGES, STEP and STL

**TEXT BOOKS:**

1. CAD/CAM Theory and Practice, Ibrahim Zeid, Tata McGraw Hill
2. Mastering CAD/CAM, Ibrahim Zeid, Tata McGraw Hill
3. CAD/CAM-Computer Aided Design and Manufacturing, Mikell P. Groover, E.W. Zimmers, Pearson Education/Prentice Hall

**INTERNET OF THINGS**

Offered by:

**ELECTRONICS AND  
COMMUNICATION  
ENGINEERING**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
<b>Internet of Things</b>	<b>Sensors Transducers and Actuators</b>	Introduction to Microcontrollers and Interfacing	Fundamentals of Internet of Things	Wireless Sensor Networks

## **OE TRACK :: INTERNET OF THINGS**

The IoT creates opportunities for more direct integration of the physical world into computer-based systems, resulting in efficiency improvements, economic benefits, and reduced human exertions. IoT is changing how we live, work, travel, and do business. It is even the basis of a new industrial transformation, known as **Industry 4.0**, and key in the digital transformation of organizations, cities, and society overall. The IoT track helps students to learn about how to

- Learn different protocols and connectivity technologies used in IOT.
- Expose the various sensors and transducers for measuring mechanical quantities.
- Develop simple applications using 8051 microcontrollers.
- Understand the key routing protocols for sensor networks and their design issues.

### **Some of the more common career paths in the Internet of Things path are**

- IoT Developer. ...
- IoT Architect...
- IoT Embedded Systems Designer...
- IoT Solutions Engineer...
- Professional in Sensors and Actuators...
- Embedded Programs Engineer...
- Safety Engineer...

**(19OE1EC01) SENSORS TRANSDUCERS AND ACTUATORS  
(Open Elective-I)**

**COURSE PRE-REQUISITES:** Engineering Physics, Electronic Measuring Instruments

**COURSE OBJECTIVES:**

- To expose the students to various sensors and transducers for measuring mechanical quantities
- To make the students familiar with the specifications of sensors and transducers
- To make the students identify for various sensors and transducers for various applications
- To expose the students to various actuators

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Be familiar with classification and characteristics of various sensors and transducers

**CO-2:** Be familiar with the principle and working of various sensors and transducers

**CO-3:** Be familiar with the principle and working of various actuators

**CO-4:** Select proper Transducer / Sensor for a specific measurement application

**CO-5:** Select proper Actuator for a specific measurement application

**UNIT – I:**

**Primary Sensing Elements and Transducers:** Mechanical devices as primary detectors, mechanical spring devices, pressure sensitive primary devices, flow rate sensing elements, Transducers-electrical Transducers, classification of Transducers, characteristics and choice of Transducers, factors influencing the choice of Transducers.

**UNIT – II:**

**Electric Transducers:** Resistive transducers, Potentiometers, Strain gauges, Types of Strain gauges, Resistance thermometers, Thermistors, Thermocouples, variable Inductance Transducers, Linear Variable Differential Transformer, Synchros, Resolvers, Capacitive Transducers, Piezo electric Transducers.

**UNIT – III:**

**Magnetic & Optical Transducers:** Hall Effect Transducers, Magneto resistors, Magneto-Elastic and Magneto-Strictive Transducers, Opto electronic Transducers, Digital Encoding Transducers, Photo Optic Transducers.

**UNIT – IV:**

**Smart Sensors & Applications:** Introduction, Primary Sensors, Excitation, Amplification, Filters, Converters, Compensation, Information Coding/Processing, Data Communication, Standards for Smart Sensor Interface, the Automation. Sensors Applications: Introduction, On-board Automobile Sensors (Automotive Sensors), Home Appliance Sensors, Aerospace Sensors, Sensors for Manufacturing, Sensors for environmental Monitoring.

**UNIT – V:**

**Mechanical and Electrical Actuators:** Mechanical Actuation Systems-Types of motion, Kinematic chains, Cams, Gears, Ratchet and pawl, Belt and chain drives, Bearings, Mechanical aspects of motor selection, Electrical Actuation Systems, Electrical systems, Mechanical switches, Solid-state switches, Solenoids, D.C. Motors, A.C. Motors, Stepper motors.

**UNIT – VI:**

**Pneumatic and Hydraulic Actuators:** Pneumatic and Hydraulic Actuation Systems-Actuation systems, Pneumatic and hydraulic systems, Directional Control valves, Pressure control valves, Cylinders, Servo and proportional control valves, Process control valves, Rotary actuators.

**TEXT BOOKS:**

1. A Course in Electrical and Electronic Measurements and Instrumentation, A. K. Sawhney, Puneet Sawhney, 19<sup>th</sup> Edition, 2011
2. Sensors and Transducers, D. Patranabis, 2<sup>nd</sup> Edition, PHI Learning Private Limited, 2013
3. Mechatronics, W. Bolton, 7<sup>th</sup> Edition, Pearson Education Limited, 2018

(19OE1EC04) INTRODUCTION TO C-SHARP  
(Open Elective-I)

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the foundations of CLR execution
- To learn the technologies of the .NET framework and object-oriented aspects of C#
- To be aware of application development in .NET
- To learn web-based applications on .NET (ASP.NET)

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Explain how C# fits into the .NET platform

**CO-2:** Analyze the basic structure of a C# application

**CO-3:** Develop programs using C# on .NET

**CO-4:** Design and develop Web based applications on .NET

**UNIT – I:**

**Introduction to C#:** Introducing C#, Understanding .NET, overview of C#, Literals, Variables, Data Types, Operators, checked and unchecked operators, Expressions, Branching, Looping, Methods, implicit and explicit casting, Constant, Arrays, Array Class, Array List, String, String Builder, Structure, Enumerations, boxing and unboxing.

**UNIT – II:**

**Object Oriented Aspects of C#:** Class, Objects, Constructors and its types, inheritance, properties, indexers, index overloading, polymorphism, sealed class and methods, interface, abstract class, abstract and interface, operator overloading, delegates, events, errors and exception, Threading.

**UNIT – III:**

**Application Development on .NET:** Building windows application, Creating our own window forms with events and controls, menu creation, inheriting window forms, SDI and MDI application, Dialog Box (Modal and Modeless), accessing data with ADO.NET, DataSet, typed dataset, Data Adapter, updating database using stored procedures

**UNIT – IV:**

SQL Server with ADO.NET, handling exceptions, validating controls, windows application configuration.

**UNIT – V:**

**Web Based Application Development on .NET:** Programming web application with web forms, ASP.NET introduction, working with XML and .NET, Creating Virtual Directory and Web Application, session management techniques, web.config, web services,

passing datasets, returning datasets from web services, handling transaction, handling exceptions, returning exceptions from SQL Server.

**UNIT – VI:**

**CLR and .NET Framework:** Assemblies, Versioning, Attributes, reflection, viewing meta data, type discovery, reflection on type, marshalling, remoting, security in .NET

**TEXT BOOKS:**

1. The Complete Reference: C# 4.0, Herbert Schildt, Tata McGraw Hill, 2012
2. Professional C# 2012 with .NET 4.5, Christian Nagel et al. Wiley India, 2012

**REFERENCES:**

# ARTIFICIAL INTELLIGENCE

Offered by:

COMPUTER SCIENCE AND  
ENGINEERING

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
Artificial Intelligence	Mathematics for Artificial Intelligence	Fundamentals of Artificial Intelligence	Machine Learning Techniques	Deep Learning

## **OE TRACK :: ARTIFICIAL INTELLIGENCE**

Artificial Intelligence (AI) is a cognitive science with highly research activities in the major areas like Machine Learning, Robotics, Natural Language Processing and image processing. This track will cover basic foundations of artificial intelligence it will make the students industry-ready for artificial intelligence and data science job roles. Artificial intelligence is used in wide range of industrial applications such as healthcare, transportation, entertainment, insurance, transport and logistics, and customer service. Future applications of AI would be utilized in automated transportation, cyborg technology, solving problems associated with climate change, deep-sea and space exploration.

(19OE1MT01) MATHEMATICS FOR ARTIFICIAL INTELLIGENCE  
(Open Elective-I)

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To introduce the basic concepts of probability and matrices in the field of Artificial Intelligence
- To identify, explore the complex problem-solving strategies
- To develop problem solving skills related to algorithmic analysis required for AI
- To apply and build mathematical model to solve real-world problems

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Explore and demonstrate practical approaches related to implementation of the AI algorithms using probability concepts

**CO-2:** Formulate and solve the Artificial intelligence related problems by using the knowledge of matrices and vectors

**CO-3:** Demonstrate the understanding of mathematical ideas from artificial intelligence perspective and machine learning

**CO-4:** Analyze and solve the complexity of a given problem with suitable optimization techniques

**UNIT – I:**

**Probability:** Basic rules and axioms, events, sample space, frequentist approach, dependent and independent events, conditional probability, Random variables, continuous and discrete, expectation, variance, distributions - joint and conditional, Bayes' theorem, Popular distributions - Bernoulli, Binomial, Poisson, Normal.

**UNIT – II:**

**Descriptive Statistics & Linear Regression:** Classification and tabulation of univariate data, graphical representation, Frequency curves. Descriptive measures - Central tendency and Dispersion. Simple Linear Regression Models.

**UNIT – III:**

**Vector Space:** Vectors, definition, scalars, addition, scalar multiplication, inner product (dot product), vector projection, cosine similarity, orthogonal vectors, normal and orthonormal vectors, vector norm, vector space, linear combination, linear span, linear independence, basis vectors.

**UNIT – IV:**

**Matrices:** Matrices definition, rank, System of equations: Direct methods - LU decomposition method, Tri-diagonal system; Applications of linear systems - Network flows and Mechanical systems.

**UNIT – V:**

**Eigen Values & Eigen Vectors:** Eigen values & eigen vectors, concept, intuition, significance, how to find principle component analysis, concept, properties, applications, Singular value decomposition, concept, properties, applications.

**UNIT – VI:**

**Multivariate Calculus:** Functions, Scalar derivative, partial derivatives, Gradient, chain rule, properties, method for derivative of vector-valued function with respect to scalar, vector four combinations - Jacobian, Hessian, Gradient of vector valued function, Gradient of matrices. Local/global maxima and minima, saddle point, convex functions, gradient descent algorithms - Learning rate, momentum, stochastic, Constrained optimization (Lagrange Multiplier method), convex optimization.

**TEXT BOOKS:**

1. Mathematics for Machine Learning, Peter Deisenroth, A. Aldo Faisal, and Cheng Soon Ong, Cambridge University Press, 2020
2. Linear Algebra and it's Applications, David C. Lay, 3<sup>rd</sup> Edition, Pearson Publications
3. Probability and Statistics for Engineers, Richard A. Johanson, 5<sup>th</sup> Edition, Prentice-Hall, 1995

**BLOCKCHAIN TECHNOLOGIES**

Offered by:

**COMPUTER SCIENCE AND ENGINEERING**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
Blockchain Technologies	Fundamentals of Computer Networks / Relational Database Management Systems	Distributed Data Bases	Cryptography and Network Security	Blockchain Technology

## **OE TRACK :: BLOCKCHAIN TECHNOLOGIES**

The blockchain is one of the fastest growing skills in the IT sector today. This track will help the students to gain knowledge in blockchain technology, it has taken quite a turn in the industry given its popularity in providing safe and secured online transactions. Most individuals and organizations have started adopting blockchain because of the many benefits it offers to the industry today. It is used in many industry applications such as banking sector, voting, health care, real estate, the legal industry and government.

(19OE1CS04) FUNDAMENTALS OF COMPUTER NETWORKS  
(Open Elective-I)

(19OE1CS04) FUNDAMENTALS OF COMPUTER NETWORKS

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To introduce the fundamental various types of computer networks
- To demonstrate the TCP/IP and OSI models with merits and demerits
- To explore the various layers of OSI model
- To introduce UDP and TCP models
- To have the concept of different routing techniques for data communications

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand and explore the basics of Computer Networks and Various Protocols and in a position to understand the World Wide Web concepts

**CO-2:** Position to administrate a network and flow of information

**CO-3:** Understand easily the concepts of network security, Mobile and ad-hoc networks

**UNIT – I:**

**Introduction to Networks:** Internet, Protocols and Standards, The OSI Model, Layers in OSI Model, TCP/IP Suite, Addressing.

**Physical Layer:** Multiplexing, Transmission Media, Circuit Switched Networks, Datagram Networks, and Virtual Circuit Networks.

**UNIT – II:**

**Data Link Layer:** Introduction, Checksum, Framing, Flow and Error Control, Noiseless Channels, Noisy Channels, Random Access Controlled Access, Channelization, IEEE Standards, Ethernet, Giga-Bit Ethernet, Wireless LANs, SONET-SDH, Frame Relay and ATM.

**UNIT – III:**

**Network Layer:** Logical Addressing, Internetworking, Tunneling, Address Mapping, ICMP, IGMP, Forwarding, Routing-Flooding, Bellman& Ford, Disjkstra's routing protocols, RIP, OSPF, BGP and Multicast Routing Protocols. Connecting Devices- Passive Hubs, Repeaters, Active Hubs, Bridges, Routers.

**UNIT – IV:**

**Transport Layer:** Process to Process Delivery, UDP, TCP and SCTP Protocols, Congestion, Congestion Control, Quality of Service.

**UNIT – V:**

**Application Layer:** Domain Name Space, DNS in Internet, Electronic Mail, File Transfer Protocol, WWW, HTTP, SNMP, Multi-Media.

**UNIT – VI:**

**Network Security:** Security services, mechanisms and attacks, IPSec, SSL, VPN, Firewall. Bluetooth, Zigbee, IPv4, IPv6.

**TEXT BOOKS:**

1. Data Communications and Networking, Behrouz A. Forouzan, 4<sup>th</sup> Edition, McGraw Hill Education, 2006

(19OE1CS08) RELATIONAL DATABASE MANAGEMENT SYSTEMS

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the basic concepts and the applications of database systems
- To master the basics of SQL and construct queries using SQL
- To understand the relational database design principles
- To become familiar with the basic issues of transaction processing and concurrency control
- To become familiar with database storage structures and access techniques

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Demonstrate the basic elements of a relational database management system

**CO-2:** Ability to identify the data models for relevant problems

**CO-3:** Ability to design entity relationship model and convert entity relationship diagrams into RDBMS and formulate SQL queries on the data

**CO-4:** Apply normalization for the development of application software

**UNIT – I:**

**Introduction:** Database System Applications, Purpose of Database Systems, View of Data, Database Languages – DDL, DML, Relational Databases, Database Design, Data Storage and Querying, Transaction Management, Database Architecture, Data Mining and Information Retrieval, Specialty Databases, Database Users and Administrators, History of Database Systems.

**Introduction to Database Design:** Database Design and ER diagrams, Entities, Attributes and Entity sets, Relationships and Relationship sets, Additional features of ER Model, Conceptual Design with the ER Model, Conceptual Design for Large enterprises.

**Relational Model:** Introduction to the Relational Model, Integrity Constraints over Relations, Enforcing Integrity constraints, Querying relational data, Logical data base Design: ER to Relational, Introduction to Views, Destroying /Altering Tables and Views.

**UNIT – II:**

**Relational Algebra and Calculus:** Preliminaries, Relational Algebra, Relational calculus – Tuple relational Calculus, Domain relational calculus, Expressive Power of Algebra and calculus.

**SQL:** Queries, Constraints, Triggers: Form of Basic SQL Query, UNION, INTERSECT, and EXCEPT, Nested Queries, Aggregate Operators, NULL values Complex Integrity Constraints in SQL, Triggers and Active Data bases, Designing Active Databases.

**UNIT – III:**

**Schema Refinement and Normal Forms:** Introduction to Schema Refinement, Functional Dependencies - Reasoning about FDs, Normal Forms, Properties of Decompositions, Normalization, Schema Refinement in Database Design, Other Kinds of Dependencies.

#### **UNIT – IV:**

**Transaction Management:** Transactions, Transaction Concept, A Simple Transaction Model, Storage Structure, Transaction Atomicity and Durability, Transaction Isolation, Serializability, Transaction Isolation and Atomicity Transaction Isolation Levels, Implementation of Isolation Levels.

#### **UNIT – V:**

**Concurrency Control:** Lock-Based Protocols, Multiple Granularity, Timestamp-Based Protocols, Validation-Based Protocols, Multiversion Schemes.

Recovery System-Failure Classification, Storage, Recovery and Atomicity, Recovery Algorithm, Buffer Management, Failure with loss of nonvolatile storage, Early Lock Release and Logical Undo Operations, Remote Backup systems.

#### **UNIT – VI:**

**Storage and Indexing:** Overview of Storage and Indexing: Data on External Storage, File Organization and Indexing, Index Data Structures, Comparison of File Organizations.

**Tree-Structured Indexing:** Intuition for tree Indexes, Indexed Sequential Access Method (ISAM), B+ Trees: A Dynamic Index Structure, Search, Insert, Delete.

Hash- Based Indexing: Static Hashing, Extendible hashing, Linear Hashing, Extendible vs. Linear Hashing.

#### **TEXT BOOKS:**

1. Database Management Systems, Raghu Ramakrishnan, Johannes Gehrke, 3<sup>rd</sup> Edition, McGraw Hill Education (India) Private Limited

## ROBOTICS

Offered by:

**ELECTRONICS AND  
INSTRUMENTATION  
ENGINEERING**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
Robotics	<b>Fundamentals of Robotics</b>	Kinematics and Dynamics of Robots	Drives and Control System for Robotics	Robot Programming and Intelligent Control Systems

## OE TRACK :: ROBOTICS

Robotics is a field of study that involves the design, construction and operation of robots. This field overlaps with electronics, computer science, mechatronics and artificial intelligence. Robotic companies are booming all over the world and are seeking engineers with skills for implementing **Next -Level Automation**. This Open Elective Track for Robotics consists of four courses and is intended for making students industry ready in the field of robotics.

The First course in this track "**Fundamentals of Robotics**" introduces various physical aspects of building a robot, exploring topics like how a robot perceives its environment using Sensors and how it interacts with its environment through various Actuators & Grippers. This course also inspects a variety of robot applications in different domains. Second Course in this track "**Kinematics & Dynamics of robots**" delves a level deeper discussing analysis and control of robots. It establishes strong mathematical foundation for describing and controlling robot movement. In this course students will learn in detail about Forward Kinematics, Inverse Kinematics, Workspace Analysis and Trajectory planning for robots.

Third Course in the Robotics track "**Drives and Control System for Robots**" explores in detail various Drive Mechanisms used in robotics such as Hydraulic, Pneumatic & Electric drives. After completing this course students will be able to analyze operational aspects of a drive system for a given robotic application. Fourth Course in the track "**Robot Programming and Intelligent Control System**" expands on Robot Programming, discussing various aspects of Robot Programming Languages and their functions. This course also dives deep into advanced topics like Artificial Intelligence, Neural Networks and Fuzzy control for robots.

(19OE1EI01) FUNDAMENTALS OF ROBOTICS  
(Open Elective-I)

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the basic components of a Robot
- To learn different types of Robot sensors and actuators used in Robotics
- To identify different types of Robot grippers and their applications
- To acquire basic Knowledge on Robot kinematics
- To expose to various application fields of Robotics

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Gain knowledge about basic concepts of robots

**CO-2:** Appreciate the usage of different sensors and actuators in Robotics

**CO-3:** Select appropriate Gripping mechanism for a particular application

**CO-4:** Analyze the direct and the inverse kinematic problems

**CO-5:** Appreciate robot design deference's for various applications

**UNIT – I:**

**Basic Concepts:** An overview of Robotics, classification of Robots, Robot Components, Robot degrees of freedom, Robot Joints, Robot Coordinates, Robot reference frames, Programming modes, Robot Characteristics.

**UNIT – II:**

**Sensors:** Sensor characteristics, Position sensors, Velocity sensors, Acceleration sensors, Force and Pressure sensors, Torque sensors, Microswitches, Light and infrared sensors, Touch and tactile sensors, Proximity sensors, Range finders.

**UNIT – III:**

**Actuators:** Characteristics of actuating system, Comparison of actuating systems, Hydraulic actuators, Pneumatic devices, Electric motors, Magneto-strictive actuators, Shape-Memory Metals, Electro-active Polymer Actuators.

**UNIT – IV:**

**Grippers:** Classification of Grippers, Drive system for Grippers, Mechanical Grippers, Magnetic Grippers, Vacuum Grippers, Adhesive Grippers, Hooks and Scoops, Gripper Force analysis and design, Active and Passive Grippers.

**UNIT – V:**

**Kinematics:** Robots as Mechanisms, Matrix Representation, Homogeneous Transformation Matrices, Representation of Transformations, Inverse of Transformation Matrices, Forward and Inverse Kinematics with Equations.

**UNIT – VI:**

**Applications:** Industrial applications, material handling, processing, assembly application, inspection application, application planning, justification of robots, non-industrial applications, Robot safety.

**TEXT BOOKS:**

1. Introduction to Robotics: Analysis, Control, Applications, Saeed B. Niku, Wiley, 2<sup>nd</sup> Edition
2. Robotics Technology and Flexible Automation, Deb S.R, John Wiley
3. Robotics and Control, R. K. Mittal, I. J. Nagrath, McGraw Hill Education

## CYBER SECURITY

Offered by:

**INFORMATION TECHNOLOGY**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
Cyber Security	Fundamentals of Computer Networks / Relational Database Management Systems	Cryptography & Network Security	Essentials of Cyber Security	Computer Forensics

## OE TRACK :: **CYBER SECURITY**

**Cybersecurity** is **important** because it incorporates everything that relates to protecting our sensitive data, personally identifiable information (PII), protected health information (PHI), personal information, intellectual property, data, and governmental and **industry** information systems from stealing and destruction endeavoured. The cyber security track helps students to learn about how to

Defend networks and data from unapproved access.

Enhanced information security and business endurance supervision.

Upgraded stakeholder confidence in your information security preparations.

Developed company authorizations with the correct security controls in place.

### **Some of the more common career paths in the cyber security path are**

- Chief Information Security Officer. ...
- Forensic Computer Analyst. ...
- Information Security Analyst. ...
- Penetration Tester. ...
- Security Architect. ...
- IT Security Engineer. ...
- Security Systems Administrator. ...
- IT Security Consultant.

**(19OE1CS04) FUNDAMENTALS OF COMPUTER NETWORKS  
(Open Elective-I)**

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To introduce the fundamental various types of computer networks
- To demonstrate the TCP/IP and OSI models with merits and demerits
- To explore the various layers of OSI model
- To introduce UDP and TCP models
- To have the concept of different routing techniques for data communications

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand and explore the basics of Computer Networks and Various Protocols and in a position to understand the World Wide Web concepts

**CO-2:** Position to administrate a network and flow of information

**CO-3:** Understand easily the concepts of network security, Mobile and ad-hoc networks

**UNIT – I:**

**Introduction to Networks:** Internet, Protocols and Standards, The OSI Model, Layers in OSI Model, TCP/IP Suite, Addressing.

**Physical Layer:** Multiplexing, Transmission Media, Circuit Switched Networks, Datagram Networks, and Virtual Circuit Networks.

**UNIT – II:**

**Data Link Layer:** Introduction, Checksum, Framing, Flow and Error Control, Noiseless Channels, Noisy Channels, Random Access Controlled Access, Channelization, IEEE Standards, Ethernet, Giga-Bit Ethernet, Wireless LANs, SONET-SDH, Frame Relay and ATM.

**UNIT – III:**

**Network Layer:** Logical Addressing, Internetworking, Tunneling, Address Mapping, ICMP, IGMP, Forwarding, Routing-Flooding, Bellman& Ford, Disjkstra's routing protocols, RIP, OSPF, BGP and Multicast Routing Protocols. Connecting Devices- Passive Hubs, Repeaters, Active Hubs, Bridges, Routers.

**UNIT – IV:**

**Transport Layer:** Process to Process Delivery, UDP, TCP and SCTP Protocols, Congestion, Congestion Control, Quality of Service.

**UNIT – V:**

**Application Layer:** Domain Name Space, DNS in Internet, Electronic Mail, File Transfer Protocol, WWW, HTTP, SNMP, Multi-Media.

**UNIT – VI:**

**Network Security:** Security services, mechanisms and attacks, IPSec, SSL, VPN, Firewall. Bluetooth, Zigbee, IPv4, IPv6.

**TEXT BOOKS:**

1. Data Communications and Networking, Behrouz A. Forouzan, 4<sup>th</sup> Edition, McGraw Hill Education, 2006
2. Computer Networks, Andrew S. Tanenbaum, 4<sup>th</sup> Edition, Pearson Education
3. Computer Networking: A Top-Down Approach Featuring the Internet, James F. Kurose, K. W. Ross, 3<sup>rd</sup> Edition, Pearson Education

(19OE1CS08) RELATIONAL DATABASE MANAGEMENT SYSTEMS

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the basic concepts and the applications of database systems
- To master the basics of SQL and construct queries using SQL
- To understand the relational database design principles
- To become familiar with the basic issues of transaction processing and concurrency control
- To become familiar with database storage structures and access techniques

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Demonstrate the basic elements of a relational database management system

**CO-2:** Identify the data models for relevant problems

**CO-3:** Design entity relationship model and convert entity relationship diagrams into RDBMS and formulate SQL queries on the data

**CO-4:** Apply normalization for the development of application software

**UNIT – I:**

**Introduction:** Database System Applications, Purpose of Database Systems, View of Data, Database Languages – DDL, DML, Relational Databases, Database Design, Data Storage and Querying, Transaction Management, Database Architecture, Data Mining and Information Retrieval, Specialty Databases, Database Users and Administrators, History of Database Systems.

**Introduction to Database Design:** Database Design and ER diagrams, Entities, Attributes and Entity sets, Relationships and Relationship sets, Additional features of ER Model, Conceptual Design with the ER Model, Conceptual Design for Large enterprises.

**Relational Model:** Introduction to the Relational Model, Integrity Constraints over Relations, Enforcing Integrity constraints, Querying relational data, Logical data base Design: ER to Relational, Introduction to Views, Destroying /Altering Tables and Views.

**UNIT – II:**

**Relational Algebra and Calculus:** Preliminaries, Relational Algebra, Relational calculus – Tuple relational Calculus, Domain relational calculus, Expressive Power of Algebra and calculus.

**SQL:** Queries, Constraints, Triggers: Form of Basic SQL Query, UNION, INTERSECT, and EXCEPT, Nested Queries, Aggregate Operators, NULL values Complex Integrity Constraints in SQL, Triggers and Active Data bases, Designing Active Databases.

**UNIT – III:**

**Schema Refinement and Normal Forms:** Introduction to Schema Refinement, Functional Dependencies - Reasoning about FDs, Normal Forms, Properties of Decompositions, Normalization, Schema Refinement in Database Design, Other Kinds of Dependencies.

#### **UNIT – IV:**

**Transaction Management:** Transactions, Transaction Concept, A Simple Transaction Model, Storage Structure, Transaction Atomicity and Durability, Transaction Isolation, Serializability, Transaction Isolation and Atomicity Transaction Isolation Levels, Implementation of Isolation Levels.

#### **UNIT – V:**

**Concurrency Control:** Lock–Based Protocols, Multiple Granularity, Timestamp-Based Protocols, Validation-Based Protocols, Multiversion Schemes.

Recovery System-Failure Classification, Storage, Recovery and Atomicity, Recovery Algorithm, Buffer Management, Failure with loss of nonvolatile storage, Early Lock Release and Logical Undo Operations, Remote Backup systems.

#### **UNIT – VI:**

**Storage and Indexing:** Overview of Storage and Indexing: Data on External Storage, File Organization and Indexing, Index Data Structures, Comparison of File Organizations.

**Tree-Structured Indexing:** Intuition for tree Indexes, Indexed Sequential Access Method (ISAM), B+ Trees: A Dynamic Index Structure, Search, Insert, Delete.

Hash- Based Indexing: Static Hashing, Extendible hashing, Linear Hashing, Extendible vs. Linear Hashing.

#### **TEXT BOOKS:**

1. Database Management Systems, Raghu Ramakrishnan, Johannes Gehrke, 3<sup>rd</sup> Edition, McGraw Hill Education (India) Private Limited
2. Database System Concepts, A. Silberschatz, Henry. F. Korth, S. Sudarshan, 6<sup>th</sup> Edition, McGraw Hill Education (India) Private Limited,
3. Database Systems, R. Elmasri, Shamkant B. Navathe, 6<sup>th</sup> Edition, Pearson Education

#### **REFERENCES:**

2. Introduction to Database Management, M. L. Gillenson and others, Wiley Student Edition
3. Database Development and Management, Lee Chao, Auerbach Publications, Taylor & Francis Group
4. Introduction to Database Systems, C. J. Date, Pearson Education

Offered by:

**INFORMATION TECHNOLOGY**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
<b>Data Sciences / Big Data &amp; Analytics</b>	<b>Statistical Methods for Data Science</b>	Computational Thinking using Python	Fundamentals of Data Mining	Data Analysis and Visualization

## OE TRACK :: DATA SCIENCES / BIG DATA & ANALYTICS

**Data science** helps in risk evaluation and observing, possible deceitful comportment, payments, customer analysis, and experience, among much other exploitation. The capability to make **data**-driven choices generates a steadier financial situation and **data scientists** make the strength of the **industry**.

As such, **data science** track helps students to apply business concepts in banking, finance, manufacturing, transport, e-commerce, education, etc. that use **data science**. As a consequence, there are numerous **Data Science** applications associated to it.

### Job Roles in Data Science Track

- Data Analyst
- Data Engineers
- Database Administrator
- Machine Learning Engineer
- Data Scientist
- Data Architect
- Statistician
- Business Analyst
- Data and Analytics Manager

**Big Data analytics** track helps the students to learn the process of gathering, establishing and examining large sets of **data** (called **Big Data**) to determine patterns and other beneficial information. Analysts occupied with **Big Data** characteristically want the acquaintance that comes from investigating the **data**.

Big data analytics is the practice of mining useful information by examining different **types** of big data sets. Big data analytics is utilized to determine concealed patterns, market developments and consumer favorites, for the advantage of organizational decision making.

### Job responsibilities in a Big Data Analytics Track are

- To gather and accumulate data from disparate sources, clean it, organize it, process it, and analyse it to extract valuable insights and information.
- To identify new sources of data and develop methods to improve data mining, analysis, and reporting.
- To create data definitions for new database files or alterations made to the already existing ones for analysis purposes.
- To present the findings in reports (in table, chart, or graph format) to help the management team in the decision-making process.
- To apply statistical analysis methods for consumer data research and analysis purposes.

- To keep track of the trends and correlational patterns among complex data sets.
- To perform routine analysis tasks to support day-to-day business functioning and decision making.
- To collaborate with Data Scientists to develop innovative analytical tools.
- To work in close collaboration with both the IT team and the business management team to accomplish company goals.

(19OE1MT02) STATISTICAL METHODS FOR DATA SCIENCE  
(Open Elective-I)

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To provide insights about the basic roles of various statistical methods in building computer applications
- To develop a greater understanding of the importance of Data Visualization techniques
- To develop problem-solving skills
- To make inferences about the population parameters using sample data
- To provide an understanding on the importance and techniques of predicting a relationship between the two sets of data and determine the goodness of fitted model

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Analyze an extremely large data set and perform exploratory data analysis to extract meaningful insights

**CO-2:** Develop various visualizations of the data in hand and communicate results of analysis effectively (visually and verbally)

**CO-3:** Examine a real-world problem and solve the same with the knowledge gained from various distributions study

**CO-4:** Use and fit a linear regression model to data and use it for prediction

**CO-5:** Fit a polynomial regression model to data and use it for prediction

**UNIT – I:**

**Introduction to Statistics:** Definition of statistics, basic objectives, applications in various branches of science with examples, collection of data: internal and external data, primary and secondary data, population and sample, representative sample.

**UNIT – II:**

**Descriptive Statistics:** Classification and tabulation of univariate data, graphical representation, frequency curves, descriptive measures - central tendency and dispersion, bivariate data, summarization, marginal and conditional frequency distribution.

**UNIT – III:**

**Introduction to R:** Introduction, Installing R and data types in R, programming using R: operators, conditional statements, looping, scripts, function creation, creating list, list operations, recursive list, creating a data frame, operations on data frames.

#### **UNIT – IV:**

**Data Visualization using R:** Import - export of data, measures of central tendency and measures of dispersion, data visualization – scatter plot, pie chart, histogram, bar chart, box plot, absolute and relative frequencies, frequency distribution.

#### **UNIT – V:**

##### **Correlation & Linear Regression:**

**Correlation:** Correlation, types of correlation, coefficient of correlation, rank correlation coefficient.

**Linear Regression:** Introduction, regression model, interval estimation, estimation of parameters of  $\beta_0$  and  $\beta_1$ , Estimation of  $\sigma^2$ .

#### **UNIT – VI:**

**Non-Linear Regression:** Regression of second-degree polynomial (non-linear least square method for polynomial function), power function, exponential, estimation of coefficients, linear and polynomial regressions in R.

#### **TEXT BOOKS:**

1. Introductory Statistics, Thomas H. Wonnacott & Ronald J. Wonnacot, John Wiley & Sons Inc., 1969
2. Applied Statistics and Probability for Engineers, Douglas C. Montgomery, George C. Runger, 3<sup>rd</sup> Edition, John Wiley & Sons, Inc., 2003
3. R for Beginners, Sandip Rakshit, 1<sup>st</sup> Edition, McGraw-Hill Education, 2017

3. Introduction of Probability Models, S. M. Ross, 11<sup>th</sup> Edition, Academic Press, N.Y., 2014
4. Statistical Methods, S. P. Gupta, 42<sup>nd</sup> Revised Edition, Sultan Chand & Sons, 2012

# SELF-DRIVING CAR

## AUTONOMOUS VEHICLES

Offered by:

**AUTOMOBILE ENGINEERING**

Courses in the OE Track:

OE Tracks	V Sem (OE-I)	VI Sem (OE-II)	VII Sem (OE-III)	VIII Sem (OE-IV)
Autonomous Vehicles	Principles of Automobile Engineering	Modern Automotive Technologies	Electric, Hybrid and Fuel Cell Vehicles	Connected and Autonomous Vehicles

## **OE TRACK :: AUTONOMOUS VEHICLES**

The invention of the wheel marked a large step in the evolution of mankind. With mobility, man experienced a new found freedom that opened the doors for several other inventions. Automobile engineering or automotive engineering is one of the most challenging careers in the field of engineering with a wide scope. This branch deals with the designing, developing, manufacturing, testing and servicing automobiles such as cars, trucks, motorcycles, scooters, etc. and the related engineering sub systems. For the perfect blend of designing and manufacturing automobiles, automobile engineering uses the features of different elements of engineering such as mechanical, electrical, electronic, instrumentation, civil, software and safety engineering. Exploring the topic from an interdisciplinary perspective is indispensable. Globalization and incredible growth of automobile industry have resulted in numerous opportunities for engineers both in India and abroad.

The 17<sup>th</sup> and 18<sup>th</sup> centuries were mostly about steam-powered vehicles transporting people and goods. While electric cars enjoyed popularity in the 19<sup>th</sup> and early 20<sup>th</sup> centuries, the later period saw the accelerated adoption of the petrol car, due to its advantages of power, mass production, cost and advances in the internal combustion engine. It is only in the 21<sup>st</sup> century that interest in electric cars has come back, given the need for cleaner, greener modes of transport. The modern period is associated with several path breaking technologies. Over the last couple of decades, there has been an explosion of electronics in vehicles. Connected cars that include technology features are ever more popular. These smart cars come with internet access, GPS, wi-fi, superior infotainment, advanced telematics and navigation capabilities. More innovations in in-vehicle infotainment and electronics promise to give car users even more enhanced capabilities in the near future.

Today, safety has become a larger concern than ever before. While entertainment and infotainment have made car driving a pleasure, this has also given rise to a growing tribe of distracted drivers. Add to this, underdeveloped roads, which take a toll on drivers today. Increased distractions and fatigue can also contribute to human fatalities. The future certainly points in the direction of driverless cars, which promise to alleviate concerns of traffic congestion and road safety. Driverless cars, also known as autonomous cars, will usher in a paradigm shift in the evolution of the modern automobile. Self-driving cars can sense the environment and traffic with the help of RADAR, LIDAR, GPS and computer vision and navigate without human intervention. Autonomous cars are claimed to have greater accuracy, reliability and faster reaction time compared to human drivers. This would lead to fewer traffic collisions and less road congestion.

Autonomous driving is a popular subject of today's discussion and automakers are developing complex systems that allow cars to drive themselves. If technology continues on its current course, car will do the concentrating for you. Self-parking, automatic emergency braking, adaptive cruise control and lane keeping are just some of the technologies that have leapt into the market in the past few years. Put them all together, get a picture of driving to assisted driving to fully autonomous cars. The open elective track "Autonomous Vehicles" offered by the department of automobile engineering trains the students to meet the technological challenges and diverse needs of the industry and society in various areas of automobile engineering and equips them to excel in a truly competitive industry. With through knowledge in this field, engineering graduates get opportunity to serve many top-notch automobile companies and IT companies as well.

<b>3</b>	<b>0</b>	<b>3</b>

**(19OE1AE01) PRINCIPLES OF AUTOMOBILE ENGINEERING  
(Open Elective-I)**

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the layout of an automobile and functionalities subsystems
- To provide overview on concepts of engine, cooling, lubrication and fuel systems
- To present constructional features and working of automotive driveline and running systems
- To study the fundamentals and principles of automotive electrical systems

**COURSE OUTCOMES** After completion of the course, the student should be able to

**CO-1:** Explain the functionalities of automotive systems and subsystems

**CO-2:** Give an overview on engine and engine subsystems.

**CO-3:** Describe working of automotive driveline and running systems

**CO-4:** Discuss the concepts of automotive starting, ignition and charging systems

**UNIT – I:**

**Introduction:** Classification of automobiles, layout of an automobile, automobile sub systems and their role. Types of chassis, role and requirement of a chassis frame, types of frames, materials, loading points and types of bodies.

**UNIT – II:**

**Engine:** Classification and components of an engine, principle and working of four stroke and two stroke SI and CI engines, petrol fuel system - carburetor, diesel fuel system - diesel fuel pump, injectors, introduction to electronic fuel injection system – MPFI and CRDI.

**UNIT – III:**

**Cooling and Lubrication:** Necessity of cooling, air-cooling, water cooling - thermosyphon and pump cooling, radiator, pump, thermostat, antifreeze solution and radiator fan. Mist, splash and forced lubrication, oil filters and oil pumps.

**UNIT – IV:**

**Drive Line:** Clutches, principle, single plate clutch, multi plate clutch and centrifugal clutch. Gear box - Need, sliding mesh, constant mesh and synchromesh gear box. Propeller shaft, universal joint, differential, wheels and tyres.

**UNIT – V:**

**Running Systems:** Suspension systems – Objective, rigid axle and independent suspension system and torsion bar. Steering system – Layout, steering mechanism, steering geometry and steering gear boxes. Brake system –Principle, stopping distance, types of brakes and actuation.

**UNIT – VI:**

**Electrical Systems:** Starting system - Principle, working of different starter drive units and solenoid switches. Ignition system - Conventional ignition system types, ignition advance and retarding mechanisms. Charging system – Alternator principle, construction and working, cut-outs and regulators.

**TEXT BOOKS:**

1. Advanced Vehicle Technology, Heinz Heisler, Butterworth Heinemann Publishers, 2002

# GENERAL-COMPUTING

Offered by:

COMPUTER SCIENCE AND  
ENGINEERING /  
INFORMATION TECHNOLOGY

## Courses in the Pool:

- Programming through Java
- Relational Data Base Management Systems
- Computational Thinking using Python
- Introduction to Data Analytics
- Fundamentals of Computer Algorithms

## OE POOL :: GENERAL-COMPUTING

### 1. Programming through Java

**Java** is an extensively **used** programming language specifically intended for use in the distributed environment of the internet. **Java** help students to create wide-ranging applications that possibly will run on a single workstation or be distributed among servers and clients in a network.

Java is an extremely fruitful language and an upper option for many developers for many years. The motive that it has remained so prevalent is since it still happens the needs of functioning across networks.

#### **Students will have different roles and responsibilities by learning Java Programming**

- Designing, implementing, and maintaining Java applications that are often high-volume and low-latency, required for mission-critical systems.
- Delivering high availability and performance.
- Contributing in all phases of the development lifecycle.
- Writing well-designed, efficient, and testable code.

### 2. Relational Database Management Systems

A relational database permits you to effortlessly find precise information. It also consents you to sort based on any field and produce reports that comprise only definite fields from each record. With features like, Data Accuracy, Easy Access to Data, Data Integrity, Flexibility, Normalization, High Security, Feasible for Future Modifications

#### **By learning RDBMS Students will have different roles in Database environment**

- Data Administrator,
- Database Administrator
- Database Designer
- Application Programmer

### 3. Computational Thinking using Python

The **python** language is one of the utmost accessible programming languages available because it has streamlined syntax and not complex, which gives more importance on natural language. Due to its comfort of learning and practice, **python** codes can be readily written and executed much quicker than former programming languages.

Data Science: The libraries and frameworks Python offers, e.g. PyBrain, PyMySQL, and NumPy are one of the big reasons. Another reason is diversity. Python experience allows you to do a lot more than any other language, e.g. you can create scripts to automate stuff, go into web development, and so much more.

## **Students will have various Job Profiles by learning Python**

- Software Engineer.
- Python Developer.
- Research Analyst.
- Data Analyst.
- Data Scientist.
- Software Developer.

## **4. Introduction to Data Analytics**

**Data** Scientists and Analysts **use data analytics** techniques in their research, and businesses also **use** it to inform their conclusions. **Data analysis** can assistance corporations healthier comprehend their customers, assess their ad-campaigns, personalize gratified, create content approaches and progress products.

### **By learning Data Analytics students will get Jobs with different designations**

- IT Systems Analyst. Systems analysts use and design systems to solve problems in information technology. ...
- Healthcare Data Analyst. ...
- Operations Analyst. ...
- Data Scientist. ...
- Data Engineer. ...
- Quantitative Analyst. ...
- Data Analytics Consultant. ...
- Digital Marketing Manager.

### (19OE11T06) PROGRAMMING THROUGH JAVA

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To introduces object-oriented programming concepts using the Java language
- To introduces the principles of inheritance and polymorphism; and demonstrates how they relate to the design of abstract classes
- To introduces the implementation of packages and interfaces
- To introduces exception handling, event handling and multithreading

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Develop applications for range of problems using object-oriented programming techniques

**CO-2:** Design simple graphical user interface applications

**CO-3:** Explore the design of graphical user interface using applets and swings

**UNIT – I:**

**Object Oriented Thinking and Java Basics:** Need for OOP Paradigm, Summary of OOP Concepts, Coping with Complexity, Abstraction Mechanisms, A Way of Viewing World – Agents, Responsibility, Messages, Methods, History of Java, Java Buzzwords, Data Types, Variables, Scope and Life Time of Variables, Arrays, Operators, Expressions, Control Statements, Type Conversion and Casting, Simple Java Program, Concepts of Classes, Objects, Constructors, Methods, Access Control, This Keyword, Garbage Collection, Overloading Methods and Constructors, Method Binding, Inheritance, Overriding and Exceptions, Parameter Passing, Recursion, Nested and Inner Classes, Exploring String Class.

**UNIT – II:**

**Inheritance, Packages and Interfaces:** Hierarchical Abstractions, Base Class Object, Subclass, Subtype, Substitutability, Forms of Inheritance- Specialization, Specification, Construction, Extension, Limitation, Combination, Benefits of Inheritance, Costs of Inheritance. Member Access Rules, Super Uses, Using Final with Inheritance, Polymorphism- Method Overriding, Abstract Classes, The Object Class. Defining, Creating and Accessing a Package, Understanding Classpath, Importing Packages, Differences between Classes and Interfaces, Defining an Interface, Implementing Interface, Applying Interfaces, Variables in Interface and Extending Interfaces, Exploring Java.IO.

**UNIT – III:**

**Exception Handling and Multi-threading:** Concepts of Exception Handling, Benefits of Exception Handling, Termination or Resumptive Models, Exception Hierarchy, Usage of Try, Catch, Throw, Throws and Finally, Built in Exceptions, Creating Own Exception Sub Classes.

String Handling, Exploring Java. Util, Differences between Multi-Threading and Multitasking, Thread Life Cycle, Creating Threads, Thread Priorities, Synchronizing

Threads, Interthread Communication, Thread Groups, Daemon Threads. Enumerations, Autoboxing, Annotations, Generics.

#### **UNIT – IV:**

**Event Handling:** Events, Event Sources, Event Classes, Event Listeners, Delegation Event Model, Handling Mouse and Keyboard Events, Adapter Classes.

The AWT Class Hierarchy, User Interface Components- Labels, Button, Canvas, Scrollbars, Text Components, Check Box, Check Box Groups, Choices, Lists Panels – Scrollpane, Dialogs, Menubar, Graphics, Layout Manager – Layout Manager Types – Border, Grid, Flow, Card and Grid Bag.

#### **UNIT – V:**

**Applets:** Concepts of Applets, Differences between Applets and Applications, Life Cycle of an Applet, Types of Applets, Creating Applets, Passing Parameters to Applets.

#### **UNIT – VI:**

**Swing:** Introduction, Limitations of AWT, MVC Architecture, Components, Containers, Exploring Swing- Japplet, JFrame and JComponent, Icons and Labels, Text Fields, Buttons – The JButton Class, Check Boxes, Radio Buttons, Combo Boxes, Tabbed Panes, Scroll Panes, Trees, and Tables.

#### **TEXT BOOKS:**

1. Java The Complete Reference, Herbert Schildt, 7<sup>th</sup> Edition, TMH
2. Understanding OOP with Java Updated Edition, T. Budd, Pearson Education
3. An Introduction to Programming and OO Design using Java, J. Nino and F.A. Hosch, John Wiley & Sons

### (19OE1CS08) RELATIONAL DATABASE MANAGEMENT SYSTEMS

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the basic concepts and the applications of database systems
- To master the basics of SQL and construct queries using SQL
- To understand the relational database design principles
- To become familiar with the basic issues of transaction processing and concurrency control
- To become familiar with database storage structures and access techniques

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Demonstrate the basic elements of a relational database management system

**CO-2:** Identify the data models for relevant problems

**CO-3:** Design entity relationship model and convert entity relationship diagrams into RDBMS and formulate SQL queries on the data

**CO-4:** Apply normalization for the development of application software

**UNIT – I:**

**Introduction:** Database System Applications, Purpose of Database Systems, View of Data, Database Languages – DDL, DML, Relational Databases, Database Design, Data Storage and Querying, Transaction Management, Database Architecture, Data Mining and Information Retrieval, Specialty Databases, Database Users and Administrators, History of Database Systems.

**Introduction to Data base design:** Database Design and ER diagrams, Entities, Attributes and Entity sets, Relationships and Relationship sets, Additional features of ER Model, Conceptual Design with the ER Model, Conceptual Design for Large enterprises.

**Relational Model:** Introduction to the Relational Model, Integrity Constraints over Relations, Enforcing Integrity constraints, Querying relational data, Logical data base Design: ER to Relational, Introduction to Views, Destroying /Altering Tables and Views.

**UNIT – II:**

**Relational Algebra and Calculus:** Preliminaries, Relational Algebra, Relational calculus – Tuple relational Calculus, Domain relational calculus, Expressive Power of Algebra and calculus.

**SQL:** Queries, Constraints, Triggers: Form of Basic SQL Query, UNION, INTERSECT, and EXCEPT, Nested Queries, Aggregate Operators, NULL values Complex Integrity Constraints in SQL, Triggers and Active Data bases, Designing Active Databases.

**UNIT – III:**

**Schema Refinement and Normal Forms:** Introduction to Schema Refinement, Functional Dependencies - Reasoning about FDs, Normal Forms, Properties of Decompositions, Normalization, Schema Refinement in Database Design, Other Kinds of Dependencies.

#### **UNIT – IV:**

**Transaction Management:** Transactions, Transaction Concept, A Simple Transaction Model, Storage Structure, Transaction Atomicity and Durability, Transaction Isolation, Serializability, Transaction Isolation and Atomicity Transaction Isolation Levels, Implementation of Isolation Levels.

#### **UNIT – V:**

**Concurrency Control:** Lock–Based Protocols, Multiple Granularity, Timestamp-Based Protocols, Validation-Based Protocols, Multiversion Schemes.

Recovery System-Failure Classification, Storage, Recovery and Atomicity, Recovery Algorithm, Buffer Management, Failure with loss of nonvolatile storage, Early Lock Release and Logical Undo Operations, Remote Backup systems.

#### **UNIT – VI:**

**Storage and Indexing:** Overview of Storage and Indexing: Data on External Storage, File Organization and Indexing, Index Data Structures, Comparison of File Organizations.

**Tree-Structured Indexing:** Intuition for tree Indexes, Indexed Sequential Access Method (ISAM), B+ Trees: A Dynamic Index Structure, Search, Insert, Delete.

Hash- Based Indexing: Static Hashing, Extendible hashing, Linear Hashing, Extendible vs. Linear Hashing.

#### **TEXT BOOKS:**

### (19OE1IT03) COMPUTATIONAL THINKING USING PYTHON

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand why Python is a useful scripting language for developers
- To create and execute Python programs and to Learn how to use lists, tuples, and dictionaries in Python programs
- To learn how to build and package Python modules for reusability
- To learn how to design object-oriented programs with Python classes
- To learn how to use exception handling in Python applications for error handling

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Adapt and combine standard algorithms to solve a given problem (includes numerical as well as non-numerical algorithms)

**CO-2:** Adequately use standard programming constructs: repetition, selection, functions, composition, modules, aggregated data (arrays, lists, etc.)

**CO-3:** Explain what a given program (in Python) does identify and repair coding errors in a program

**CO-4:** Understand and use object-based software concepts (constructing OO software will be dealt with in the course Software Engineering)

**CO-5:** Use library software for (e.g.) building a graphical user interface, web application, or mathematical software

**UNIT – I:**

Introduction, History, Features, Setting up path, Working with Python, Basic Syntax, Variable and Data Types, Operator, Conditional Statements-If  
If- else Nested if-else Looping for While Nested loops Control Statements Break  
Continue Pass String Manipulation Accessing Strings Basic Operations String slices  
Function.

**UNIT – II:**

**Methods, Lists:** Introduction, Accessing list, Operations, Working with lists, Function and  
**Methods, Tuple:** Introduction, Accessing tuples, Operations, Working, Functions and  
Methods

**Dictionaries:** Introduction, Accessing values in dictionaries, Working with dictionaries,  
Properties.

**UNIT – III:**

**Functions:** Defining a function, Calling a function, Types of functions, Function  
Arguments, Anonymous functions, Global and local variables.

**Modules:** Creation, Importing module, Math module, Random module, Packages.

#### **UNIT – IV:**

**Composition:** Input-Output-Printing on screen, Reading data from keyboard, Opening and closing file Reading and writing files, Functions.

**Exception Handling:** Exception, Exception Handling, Except clause, Try? Finally clause, User Defined Exceptions

#### **UNIT – V:**

**OOPs concept:** Class and object, Attributes, Inheritance, Overloading, Overriding, Data hiding, Regular expressions- Match function, Search function, Matching VS Searching, Modifiers, Patterns.

**Multithreading:** Thread, Starting a thread, Threading module, Synchronizing threads.  
CGI: Introduction, Architecture, CGI environment variable, GET and POST methods, Cookies, File upload.

#### **UNIT – VI:**

**Database:** Introduction, Connections, Executing queries, Transactions Handling error, Networking: Socket, Socket Module, Methods, Client and server, Internet modules, Sending email.

#### **TEXT BOOKS:**

1. Learning Python, David Ascher and Mark Lutz, 2<sup>nd</sup> Edition, O'Reilly, 2003

#### **REFERENCES:**

1. Python Programming: An Introduction to Computer Science, John M. Zelle, 2<sup>nd</sup> Edition, Kindle Edition
2. Python Essential Reference, David M. Beazley, 4<sup>th</sup> Edition, Developer's Library

### (19OE1IT07) INTRODUCTION TO DATA ANALYTICS

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To be exposed to conceptual framework of big data
- To understand different techniques of data analysis
- To be familiar with concepts of data streams
- To be exposed to item sets, clustering, frame works and Visualization

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand big data fundamentals

**CO-2:** Learn various data analysis techniques

**CO-3:** Implement various data streams

**CO-4:** Understand item sets, clustering, frame works & Visualizations

**UNIT – I:**

**Introduction to Big Data:** Introduction to Big Data Platform – Challenges of Conventional systems – Web data – Evolution of Analytic scalability, analytic process and tools, Analysis vs Reporting – Modern data analytic tools,

**Statistical Concepts:** Sampling distributions, resampling, statistical inference, prediction error.

**UNIT – II:**

**Data Analysis:** Regression modeling, Multivariate analysis, Bayesian modeling, inference and Bayesian networks, Support vector and Kernel methods

**Analysis of Time Series:** Linear systems analysis, nonlinear dynamics – Rule induction –

**Neural Networks:** Learning and and Generalisation, competitive learning, Principal component analysis and neural networks

**Fuzzy Logic:** extracting fuzzy models from data, fuzzy decision trees, Stochastic search methods.

**UNIT – III:**

**Mining Data Streams:** Introduction to Streams Concepts – Stream data model and architecture – Stream Computing, Sampling data in a stream – Filtering streams – Counting distinct elements in a stream – Estimating moments – Counting oneness in a Window – Decaying window – Real time Analytics Platform (RTAP) applications – case studies – real time sentiment analysis, stock market predictions.

**UNIT – IV:**

**Frequent Itemsets and Clustering:** Mining Frequent itemsets – Market based Modeling – Apriori Algorithm – Handling large data sets in Main Memory – Limited Pass Algorithm – Counting frequent itemsets in a Stream – Clustering Techniques – Hierarchical – K-Means.

**UNIT – V:**

Clustering high dimensional data – CLIQUE and ProCLUS – Frequent pattern-based clustering methods – Clustering in non-Euclidean space – Clustering for streams and Parallelism.

**UNIT – VI:**

**Frameworks and Visualization:** MapReduce – Hadoop, Hive, MapR – Sharding – NoSQL Databases – S3 – Hadoop Distributed file systems – Visualizations – Visual data analysis techniques,

**Interaction Techniques:** Systems and Applications

**TEXT BOOKS:**

1. Intelligent Data Analysis, Michael Berthold, David J. Hand, Springer, 2007
2. Mining of Massive Datasets, Anand Rajaraman and Jeffrey David Ullman, Cambridge University Press, 2012

**REFERENCES:**

1. Taming the Big Data Tidal Wave: Finding Opportunities in Huge Data Streams with Advanced Analytics, Bill Franks, John Wiley & Sons, 2012
2. Big Data Glossary, Glenn J. Myatt, Making Sense of Data, John Wiley & Sons, Pete Warden, O'Reilly, 2011
3. Data Mining Concepts and Techniques, Jiawei Han, Micheline Kamber, 2<sup>nd</sup> Edition, Elsevier, 2008

(19OE1CS11) FUNDAMENTALS OF COMPUTER ALGORITHMS

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To reinforce algorithms analysis methods
- To ability to analyse running time of an algorithm
- To understand different algorithm design strategies
- To familiarity with an assortment of important algorithms

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Apply algorithm design techniques and concepts to solve given engineering problem

**CO-2:** Analyze running times of algorithms using asymptotic analysis

**CO-3:** Develop efficient algorithms for computational tasks

**CO-4:** Computing complexity measures of algorithms

**UNIT – I:**

**Introduction:** Characteristics of algorithm. Analysis of algorithms: Asymptotic analysis of complexity bounds – best, average and worst-case behaviour; Performance measurements of Algorithm, Time and space trade-offs.

**UNIT – II:**

**Divide and Conquer:** General method, applications-Binary search, Quick sort, Merge sort, Strassen's matrix multiplication. Analysis of recursive algorithms through recurrence relations: Substitution method, Recursion tree method and Masters' theorem.

**UNIT – III:**

**Greedy Method:** General method, applications-Job sequencing with deadlines, 0/1 knapsack problem, Minimum cost spanning trees, Single source shortest path problem, Huffman Codes.

**UNIT – IV:**

**Dynamic Programming-I:** General method, Principle of optimality, applications-Multistage graphs, Matrix chain multiplication, Optimal binary search trees.

**UNIT – V:**

**Dynamic Programming-II:** 0/1 knapsack problem, All pairs shortest path problem, Travelling sales person problem, Reliability design.

**UNIT – VI:**

**Backtracking:** General method, applications- N-Queen problem, Sum of subsets problem, Graph coloring, Hamiltonian cycles.

**TEXT BOOKS:**

1. Fundamentals of Computer Algorithms, E. Horowitz et al, Galgotia Publications
2. Introduction to Algorithms, Thomas H. Cormen, Charles E. Lieserson, Ronald L. Rivest and Clifford Stein, 4<sup>th</sup> Edition, MIT Press/McGraw-Hill

**REFERENCES:**

1. Algorithm Design, Jon Kleinberg and EvaTardos, 1<sup>st</sup> Edition, Pearson
2. Algorithm Design: Foundations, Analysis and Internet Examples, Michael T. Goodrich and Roberto Tamassia, Second Edition, Wiley
3. Algorithms – A Creative Approach, Udi Manber, 3<sup>rd</sup> Edition, Addison-Wesley, Reading, MA

### (19OE1HS01) PROFESSIONAL ETHICS AND HUMAN VALUES

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To emphasize on the importance of ethics for engineers and computer scientists
- To provide a toolkit for ethical behaviour in personal and professional settings
- To relate the profession of engineering to sociocultural as well as ethical and moral contexts in India and globally
- To develop more socially conscious engineers who create and conceive a better society and a better world without sacrificing or ignoring public good

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Distinguish morals, values, and ethics in Indian and global contexts

**CO-2:** Resolve moral and ethical dilemmas through ethical inquiries and appropriate ethical theories

**CO-3:** Realize the professional role of engineers in society and the support available in creating safe solutions for the society focusing on public welfare

**CO-4:** Conduct themselves ethically in various roles that present themselves in professional and business environments

**UNIT – I:**

**Motivation and Introduction to Human Values:** Motivation to study ethics in engineering with justifying case studies, historical events, and current affairs; Morals, Values, and Ethics – Definitions; Moral Judgement vs. Value Judgement; Moral Character and Moral Autonomy – Conscientiousness, Integrity, Empathy as basic building blocks; The Golden Rule; Maslow's Theory of Needs; Universal Human Values and Theories; Conventional and Constitutional Values in Indian Ethos; Anomie vs. Civic Virtue as a foundation for an ideal society; Ethics as a basis of legal framework; Privacy and Confidentiality – Increasing emphasis in personal and professional lives, technological considerations and examples; Profession, Professionalism – Definitions, Engineering as a Profession

**UNIT – II:**

**Ethics, Ethical Theories, and Professionalism:** Ethics through Spirituality, Religion, and beyond; Indian Philosophy and Ethos, ancient to modern – Family System, Ethical Pluralism, Unity in Diversity; Ethics as application of values and as moral philosophy – Kohlberg's theory vs. Gilligan's theory of moral development leading to ethics, examples; Moral and Ethical Dilemmas – Definition, Causes, Case Studies and Examples; Resolution of Ethical Dilemmas through Ethical Inquiries – Normative, Conceptual, and Factual Inquiries, Classification of Ethics by Character and Conduct – Consequentialism/ Utilitarianism, Deontological Ethics, Virtue Ethics and Theories,

Rights Theories; Ethical Frameworks and examples; Practical application of ethical theories for decision-making in personal life

### **UNIT – III:**

**Professionalism, Engineering in the Societal Context:** Professionalism – Professional Traits, Rights, Responsibilities, Roles, Virtues; Business Ethics; Engineering as Social Experimentation – Context with examples, Comparison with standard experiments, Application of Ethical Inquiries to gain knowledge and to gather relevant information, Responsibility of Experimenters, Accountability and Answerability, Consensus and Need for Informed Consent – how to address exceptions; Responsible Innovation – Social Context of Innovation, Responsible Research and Innovation, Data Privacy and Protection of Individual Rights, being Ethical by Design; Trust in the context of professionalism – confidentiality, non-disclosure agreements (NDA); Intellectual Property (IP) – IP Rights (IPR) as Professional Rights, Law, Moral Rights and Economic Rights, Patenting; Diverse roles of Engineers as Professionals – Manager, Leader, Consultant, and Expert Witness

### **UNIT – IV:**

**Professional Ethics, Ethics at Workplace and Roles of Engineers:** Overview of Organizational Behaviour; Collegiality, Loyalty, Trust in professional context; Respect for Authority vs. Moral Autonomy, Moral Responsibility; Organizational context of Ethics – Minor, interpersonal, severe, organizational workplace deviances; Occupational Crime, Culpable mistakes, Collateral damage; Gifts and bribes; Industrial Ethics for non-professionals; Code of ethics and Code of Conduct – Role of professional societies in guiding, promoting, and protecting professionals and professions, Examples of common professional societies in Engineering and Science; Decision-making in professional context – Choosing the right guidance, choosing the right ethical theory; Conflicts in profession and at workplace - Employee Relations and Discrimination, Conflict of Interest, Conflict Management and Resolution, Framework for Conflict Resolution; Multinational Companies and Corporates – Work Culture and Respect for Diversity and Pluralism; Employee Rights vs. Professional Rights; Whistleblowing – Social, Organizational, and Legal context with examples

### **UNIT – V:**

**Public Welfare, Safety & Risk:** Impact of engineering activities and technology on Public Welfare; Ethical Concerns of Public welfare in the context of Emerging Technologies – Artificial Intelligence, Machine Learning, Internet of Things, Cybersecurity and Cybercrime; Issues of Public Concern – Informed Consent, Health and environmental aspects, data security; Safety and Risk – Definitions; Risk Assessment – Known and Unintended consequences, Risk-Benefit Analysis, Reducing Risk, Optimum Level of Safety, Capability Curves, Safe Exit; Learning from the Past – Case Studies in Ethics Context: Titanic, Bhopal, Chernobyl; Environmental Ethics and Sustainable Development Goals; Computer Ethics and various Technology Ethics; Ethics in the context of War and Weapon Development; Ethics and Economics – Fair Trade, Capitalism vs. Communism, Developed vs. Developing vs. Underdeveloped economies

## **UNIT – VI:**

**Ethics for Lifelong Learning:** Ethics in the context of Globalization; Moral Character and Ethical Leadership – Case Studies and Examples of success and failure; Overview and comparison of different schools of thought, comparison of the works of pioneering philosophers and social scientists – Immanuel Kant, John Rawls, Martin Heidegger, Swami Vivekananda, Jiddu Krishnamurti, Dr. Abdul Kalam, etc.; Impact of Ethical and Unethical Behaviour in personal and professional lives, developing and maintaining ethical behaviour, threats to moral autonomy and how to continue to be ethical in personal and professional lives

### **TEXT BOOKS:**

1. Ethics in Engineering, Mike W. Martin, Roland Schinzinger, McGraw Hill Education, 2017 (ISBN: 978-9339204457)
2. Business Ethics: An Indian Perspective, A.C. Fernando, K.P. Muralidheeran, E.K. Satheesh, Pearson Education, 2019 (ISBN: 978-9353437442)
3. Professional Ethics, R. Subramanian, Oxford University Press, 2017 (ISBN: 978-0199475070)

### **REFERENCES:**

(19OE1CE09) SMART CITIES

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand smart city basic concepts, global standards, and Indian context of smart cities
- To explain smart community, smart transportation and smart buildings
- To understand Energy demand, Green approach to meet Energy demand and their capacities
- To identify Smart Transportation Technologies in cities and concepts towards smart city

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Explain and elaborate smart city concepts and their international and national standards

**CO-2:** Conceptualize smart community, transportation and building concepts

**CO-3:** Develop and calibrate energy demand and their capacity limits

**CO-4:** Predict the various smart urban transportation systems and the transition from existing city towards a smart city

**UNIT – I:**

**Introduction to Smart Cities:** Introduction to Smart Cities - Understanding Smart Cities - Dimensions of Smart Cities – World urbanization, Global Experience of Smart Cities, Smart City case studies-Indian scenario - India “100 Smart Cities” Policy and Mission.

**UNIT – II:**

**City as a System of Systems:** Systems thinking – Developing a smart city approach – Core elements of a smart city – Relevant open data for a smart city – Sustainability – Privacy and Ethics – Energy systems for smarter cities.

**UNIT – III**

**Smart Cities Planning and Development:** Introduction to Smart Community; Smart community concepts: Concept of Smart Community - Smart Transportation - Smart Building and Home Device - Smart Health - Smart Government - Smart Energy and Water - Cybersecurity, Safety, and Privacy; Internet of Things, Blockchain, Artificial Intelligence, Alternate Reality, Virtual Reality.

**UNIT – IV:**

**Smart Urban Energy Systems:** Conventional vs. Smart, City components, Energy demand, Green approach to meet Energy demand, Index of Indian cities towards smartness – a statistical analysis -Meeting energy demand through direct and indirect solar resources- Efficiency of indirect solar resources and its utility, Capacity limit for

the indirect solar resources- Effectiveness in responsive environment in smart city;  
Smart communication using green resources- **Relevant case studies**

#### **UNIT – V:**

**Smart Transportation Systems:** Smart Transportation Technologies - Driverless and connected vehicles - ride sharing solutions - The "improve" pathway - The "shift" pathway – Smart Roads and Pavement systems – Relevant case studies

#### **UNIT – VI:**

**Future of Smart Cities:** The transition of legacy cities to Smart - Right transition process - the benefit of citizens, cities have to adopt effective management and governance approaches-factors in the transition phase of legacy cities to Smart cities and their managerial implications.

#### **TEXT BOOKS:**

1. Internet of Things in Smart Technologies for Sustainable Urban Development, G. R. Kanagachidambaresan, R. Maheswar, V. Manikandan, K. Ramakrishnan., Springer, 2020
2. Society 5.0: A People-Centric Super-Smart Society, Hitachi-UTokyo Laboratory (H-UTokyo Lab), Springer, 2020
3. The Routledge Companion to Smart Cities, Katharine S. Willis, Alessandro Aurigi, Routledge International Handbooks, 2020

#### **REFERENCES:**

1. Smart Cities in Asia: Governing Development in the Era of Hyper-Connectivity Yu-min Joo, Yu-Min Joo, Teck-Boon Tan, Edward Elgar Pub, 2020
2. Urban Systems Design: Creating Sustainable Smart Cities in the Internet of Things Era, Yoshiki Yamagata, Perry P. J. Yang, Elsevier, 2020
3. Smart Cities and Artificial Intelligence: Convergent Systems for Planning, Design, and Operations, Christopher Grant Kirwan, Zhiyong Fu, Elsevier, 2020

(19OE1EE05) TRENDS IN ENERGY SOURCES FOR SUSTAINABLE DEVELOPMENT

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the role of sustainable energy
- To know components of solar PV and wind energy conversion systems
- To understand the principles of Biomass, geo-thermal and wave energy systems
- To learn various energy storage methods

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand various sources for sustainable energy

**CO-2:** Understand Solar Photo voltaic and wind energy systems

**CO-3:** Learnt the harnessing techniques of Biomass, geothermal and ocean energy

**CO-4:** Familiarize with energy storage methods

**UNIT – I:**

**Introduction:** Trends in energy consumption - Conventional and renewable sources, Energy sources and their availability, Energy Conservation status in India -need of new energies for sustainable development.

**UNIT – II:**

**Fundamentals of Solar Radiation:** Introduction-The Sun as Source of Energy, Extraterrestrial and Terrestrial Radiations, Spectral Power Distribution of Solar Radiation, instruments for measuring solar radiation and sunshine recorder.

**Solar PV Conversion:** The PV Cell-Crystalline Solar cells -Thin film and amorphous solar cells, Module, Array, Equivalent Electrical circuit- Open circuit voltage and Short circuit current, I-V, P-V Curves. Developments in efficient non silicon solar cells

**UNIT – III:**

**Wind Energy:** origin of winds-Global (or Planetary) Winds- Local Winds-Factors Affecting the Distribution of Wind Energy on the Surface of Earth, Wind Turbine – Types, construction of HAWT, VAWT, performance characteristics, Betz criteria.

**UNIT – IV:**

**Bio-Mass:** Principles of Bio-Conversion, Anaerobic/aerobic digestion, types of Biogas digesters, combustion characteristics of bio-gas, utilization for cooking, I.C. Engine operation and economic aspects.

**UNIT – V:**

**Geothermal Energy:** Resources, types of wells, methods of harnessing the energy

**Ocean Energy:** OTEC, Principles utilization, setting of OTEC plants, thermodynamic cycles.

**Tidal and Wave Energy:** Potential and conversion techniques, mini-hydel power plants, and their economics.

**UNIT – VI:**

**Energy Storage:**

**Electro Chemical Storage:** lead-acid- nickel cadmium-nickel-metal-hydride and lithium type batteries-Principle of operation, Types, Advantages and disadvantages.

**Non-Electric Storage:** Methods of Energy storage –Pumped Energy Storage – Compressed air Energy Storage, Superconducting Magnet Energy Storage.

**TEXT BOOKS:**

1. Non-Conventional Energy Sources, G.D. Rai, 6<sup>th</sup> Edition, Khanna Publishers, 2004
2. Non-Convention Energy Resources, B.H. Khan, 3<sup>rd</sup> Edition, McGraw Hill, 2017

**REFERENCES:**

1. Renewable Energy Sources, Twidell & Weir, 3<sup>rd</sup> Edition, CRC Press, 2015
2. Solar Energy, Sukhatme, 3<sup>rd</sup> Edition, McGraw Hill, 2008

(19OE1ME05) 3D PRINTING AND DESIGN

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the need and know about the applications of 3D Printing
- To understand the need of liquid and solid based 3D Printing systems
- To know about the laser-based 3D Printing systems and importance of CAD for 3D Printing
- To understand post-processing, inspection and testing involved in 3D Printing

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Summarize the importance of 3D Printing

**CO-2:** Explain the process involved in liquid and solid based 3D Printing Systems

**CO-3:** Explain about the laser-based 3D Printing systems and CAD for 3D Printing

**CO-4:** Plan post-processing techniques and perform inspection and testing in 3D Printing

**UNIT – I:**

**Introduction:** Introduction to 3D Printing, Classification, 3D Printing Process Chain, Materials for 3D Printing, Distinction between 3D Printing & Conventional Manufacturing.

**Applications:** Brief overview of applications in Aerospace, Automotive, Biomedical, Defense, Construction, Jewelry, Coin and Tableware Industry.

**UNIT – II:**

**Liquid Based 3D Printing Systems:** Introduction, Principle, Processes and Applications of Material Jetting and Stereolithography.

**UNIT – III:**

**Solid Based 3D Printing Systems:** Introduction, Principle, Processes and Applications of Fused Deposition Modeling (FDM) and Laminated Object Manufacturing (LOM).

**UNIT – IV:**

**Powder Based 3D Printing Systems:** Introduction, Principle, Processes and Applications of Selective Laser Sintering (SLS), Three-Dimensional Printing (3DP).

**UNIT – V:**

**CAD for 3D Printing:** CAD data formats, CAD model preparation, Part orientation and support generation, Overview of 3D Printing softwares like MAGICS and MIMICS only.

**UNIT – VI:**

**Post Processing:** Introduction, Post Processing Techniques like Support material removal, Cleaning, Sanding and Polishing.

**Inspection:** Introduction, Significance, Inspection techniques like Dimensional measurement along X, Y and Z axes, visual inspection of the surface finish (overall aesthetics and intact features), flatness or warp check, and FOD (foreign objects or debris) check.

**TEXT BOOKS:**

1. Additive Manufacturing Technologies: Rapid Prototyping to Direct Digital Manufacturing, Ian Gibson, David W Rosen, Brent Stucker., Springer, 2010
2. Rapid Prototyping: Principles and Applications, Chua C.K., Leong K.F., and Lim C.S., 3<sup>rd</sup> Edition, World Scientific, 2010

**REFERENCES:**

(19OE1EC09) EMBEDDED SYSTEMS FOR IOT

**COURSE PRE-REQUISITES:** Programming through C

**COURSE OBJECTIVES:**

- To understand the basics of computing with Embedded Systems
- To expose the students to various smart sensors
- To make the students familiar with the programming concepts of Embedded development board
- To understand the basics of Internet of Things and Cloud of things

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Be familiar with architectural and programming issues of Embedded Systems

**CO-2:** Select proper smart Sensor for a specific measurement application

**CO-3:** Analyze various protocols for Internet of Things

**CO-4:** Apply Internet of Things to different applications in the real world

**UNIT – I:**

**Embedded System Design:** Numbering and Coding Systems, Digital Premier, Inside the Computer

**Embedded System:** Definition, Characteristics of embedded computing applications, Design challenges, Requirements, Specification, Architecture design, Designing hardware and software components, system integration.

**UNIT – II:**

**Smart Sensors & Applications:** Introduction, Primary Sensors, Excitation, Amplification, Filters, Converters, Compensation, Information Coding/Processing, Data Communication, Standards for Smart Sensor Interface, the Automation.

**UNIT – III:**

**Sensors Applications:** Introduction, On-board Automobile Sensors (Automotive Sensors), Home Appliance Sensors, Aerospace Sensors, Sensors for Manufacturing, Sensors for environmental Monitoring.

**UNIT – IV:**

**Micro Controller Board:** Features of Arduino, Arduino components and IDE, Interfacing: Seven Segment Display, Pulse Width Modulation, Analog Digital Converter, Wireless connectivity to Arduino. Case study: From BT To WiFi: Creating WiFi Controlled Arduino Robot Car.

**UNIT – V:**

**Introduction to Internet of Things:** Definition and Characteristics of IoT, Physical Design of IoT, Logical Design of IoT, IoT enabled Technologies – Wireless Sensor Networks,

Cloud Computing, Big data analytics, Communication protocols, Embedded Systems, IoT Levels and Deployment Templates, M2M, IoT vs M2M.

**UNIT – VI:**

**Domain Specific Applications of IoT:** IoT Design Methodology, Applications of IoT– Home, Health, Environment, Energy, Agriculture, Industry and Smart City.

**TEXT BOOKS:**

1. The 8051 Microcontroller: Programming, Architecture, Ayala & Gadre, 3<sup>rd</sup> Edition, Cengage Publications, 2008
2. Sensors and Transducers, D. Patranabis, 2<sup>nd</sup> Edition, PHI Learning Private Limited, 2013

(19OE1CS09) ARTIFICIAL INTELLIGENCE – A BEGINNER’S GUIDE

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand and analyze the basic concepts of artificial intelligence
- To identify, explore the complex problem-solving strategies and approaches
- To analyze the concepts of basic concepts of neural networks and learning process
- To explore and analyze the methodology used in machine learning and computer vision

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand and apply the basic concepts of artificial intelligence and its use cases. lives

**CO-2:** Explore the various search strategies and approaches for problem solving

**CO-3:** Correlate the fields related to AI, and articulate various learning paradigms

**CO-4:** Describe several issues and ethical concerns surrounding AI

**UNIT – I:**

**Introduction to AI:** What is AI-On Overview, History of AI, Applications and Examples of AI, AI Concepts, Terminology, Key fields of AI. AI Issues, Concerns, and Ethical Considerations.

**UNIT – II:**

**AI as Search Process:** On overview of Search Strategy. Types of Searches- Uninformed, Informed, Bidirectional search, Heuristic search. Local search, Local beam search, Adversarial Search.

**UNIT – III:**

**AI as Knowledge Exploration:** Introduction to Propositional Logic, Rules of Inference, First Order Logic (FOL) Syntax, Semantics, Entailment, Tools to represent knowledge.

**UNIT – IV:**

**AI as a Learning Task:** Introduction to Learning, Learning types -Supervised, Unsupervised, Reinforcement Learning, Machine learning, Deep Learning, The link between AI, ML, DL.

**UNIT – V:**

**AI as Neural Networks:** Introduction to biological neural networks. Link between biological neuron and artificial neuron. Architecture of artificial neural network, Types of Neural networks-single layer, multilayer, Back propagation networks.

**UNIT – VI:**

**The future of AI:** Computer Vision - Seeing the World Through AI, Bots - Conversation as a Platform, AI and the society, AI in action-the Use Cases, Building AI Projects.

**TEXT BOOKS:**

1. Artificial Intelligence: A Modern Approach, Stuart Russell and Peter Norvig, 3<sup>rd</sup> Edition, Prentice Hall, 2010
2. Machine Learning, Tom M. Mitchell, M. C. Graw Hill Publications
3. Neural Networks-A Comprehensive Foundation, Simon Haykin, 2<sup>nd</sup> Edition, Pearson Education, 2004

(19OE1CS10) BLOCKCHAIN TECHNOLOGY ESSENTIALS

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To introduce and get the technological overview of blockchain technologies
- To Study the foundation of Blockchain Technology and demonstrate the various types of Blockchain
- To explore the application area of Blockchain Technology
- To introduce smart contract, consensus algorithm and Security Mechanism
- Introduction to available platforms to implement Blockchain Technology

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand and explore the Blockchain Technology

**CO-2:** Describe smart contract concepts

**CO-3:** Explore different types of Blockchain

**CO-4:** Develop the platforms to implement Blockchain Technology

**UNIT – I:**

**Fundamental of Blockchain Part I:** Introduction to Centralized, Decentralized and Distributed system, computer network peer to peer connection

**Fundamental of Blockchain Part II:** History of Blockchain, Various technical definitions of Blockchain. Generic elements of a blockchain: Block, Transaction, Node, Why It's Called "Blockchain", Characteristics of Blockchain Technology, Advantages of blockchain technology, Limitations of blockchain as a technology

**UNIT – II:**

**Concept of Blockchain Technology Part I:** Applications of blockchain technology, Tiers of blockchain technology Blockchain 0, Blockchain 1, Blockchain 2, Blockchain 3, Generation of Blockchain X, smart contract

**Concept of Blockchain Technology Part II:** Types of blockchain: Public blockchain, private blockchain, hybrid blockchain, examples of Public, private, hybrid blockchain and its merit and demerit.

**UNIT – III:**

**Technical Foundations Part I:** Component of block, Structure of Block chain, Technical Characteristics of the Blockchain, genesis block, Nonce

**Technical Foundations Part II:** Cryptography, Hashing, Distributed database, Consensus mechanisms, and basic of Cryptographic primitives, Technical Characteristics of Secure Hash Algorithms (SHA), Digital signature.

#### **UNIT – IV:**

**Consensus Algorithm:** Proof of work (PoW), Proof-of-Stake (PoS), Byzantine Fault Tolerance (BFT), Proof of authority (PoA), Confidentiality, Integrity, Authentication, Permissioned ledger, Distributed ledger, Shared ledger, Fully private and proprietary blockchains, Tokenized blockchains, Tokenless blockchains, CAP theorem and blockchain

#### **UNIT – V:**

E-Governance and other contract enforcement mechanisms, Financial markets and trading, Trading, Exchanges, Trade life cycle, Order anticipators, Market manipulation.  
**Crypto Currency:** Bitcoin, Bitcoin definition, Keys and addresses, Public keys in Bitcoin, Private keys in Bitcoin, Bitcoin currency units

#### **UNIT – VI:**

**Implementation Platforms:** Hyperledger as a protocol, Reference architecture, Hyperledger Fabric, Transaction Flow, Hyperledger Fabric Details, Fabric Membership, Fabric Membership

#### **TEXT BOOKS:**

1. Mastering Blockchain, Imaran Bashir, 2<sup>nd</sup> Edition, Packt
2. Blockchain Basic, Daniel Drescher, A Press

#### **REFERENCES:**

1. Blockchain For Dummies®, IBM Limited Edition, John Wiley & Sons, Inc

(19OE1EI05) FUNDAMENTALS OF ROBOTICS AND DRONES

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To classification by coordinate system and control system
- To acquire knowledge on different types Power Sources and Sensors
- To classify different types of Manipulators, Actuators and Grippers
- To acquire knowledge on kinematics and Vision systems used for different Robots
- To acquire knowledge on the basics of Drones

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Acquire knowledge on different types of Power Sources (actuators) and Sensors, Manipulators, Actuators and Grippers

**CO-2:** Acquire knowledge on different applications of various types of robots

**CO-3:** Analyze the direct and the inverse kinematic problems and calculate the manipulator dynamics

**CO-4:** Acquire knowledge on the applications of Machine Vision in Robotics

**CO-5:** Acquire Knowledge on the basics of Drones

**UNIT – I:**

**Basic Concepts & Fundamentals:** An overview of Robotics, classification of Robots, Robot Components, Robot degrees of freedom, Robot Joints, Robot Coordinates, Robot reference frames, Programming modes, Robot Characteristics.

**UNIT – II:**

**Sensors and Actuators:**

**Sensors:** Sensors characteristics, Position sensors, velocity sensors, acceleration sensors, torque sensors, micro switches, lighten infrared sensors, touch and tactile sensors, proximity sensors, range finders.

**Actuators:** Characteristics of activating system, comparison of activating system Hydraulic devices, Pneumatic devices, electric motors, magneto-strictive actuators.

**UNIT – III:**

**Manipulators and Grippers:**

**Grippers:** Robot end effectors, Classification, drive system for Gripper, Mechanical Grippers, Magnetic Grippers, Vacuum Grippers, Adhesive Grippers, Hooks, Scoops and other Miscellaneous Devices, Gripper force Analysis and Gripper Design, Active and passive Grippers.

**UNIT – IV:**

**Kinematics:** Matrix representation of translational and Rotational motion – Homogeneous Transformation-DH representation of standard configuration Robots-Inverse Kinematics. Joint space vs. Cartesian space-Basics of Trajectory planning in joint and Cartesian space.

**UNIT – V:**

**Robot Vision:** Low level and High-level vision

Image acquisition, Illumination Techniques, Imaging Geometry, Some Basic Relationships between Pixels, Segmentation, Description, Segmentation and Description of 3-D Structures, Recognition, Interpretation.

**UNIT – VI:**

**Basics of Drones:** Theory behind how drones work, individual components that makeup a drone, basic concepts involved radio-controlled model flying, building a complete quad copter drone from scratch

**TEXT BOOKS:**

1. Introduction To Robotics: Analysis, Control, Applications, Wiley, Saeed B. Niku, 2<sup>nd</sup> Edition
2. Industrial Robotics, Technology Programming and Applications, Mikell P. Groover, Nicholas G Odrey, Mitchel Weiss, Roger N. Nagel, Ashish Dutta, McGraw Hill, 2012

**REFERENCES:**

1. Robotics Technology and Flexible Automation, Deb S. R, John Wiley
2. Robots and Manufacturing Automation, Asfahl C. R, John Wiley
3. Robotic Engineering–An Integrated Approach, Klaffer. R.D, Chimielewski. T.A, Negin. M, Prentice Hall of India, New Delhi
4. Drones for Beginners, Udemey

<b>L</b>	<b>T/P/D</b>	<b>C</b>
<b>3</b>	<b>0</b>	<b>3</b>

**(19OE1IT08) FUNDAMENTALS OF CYBER SECURITY**

**COURSE PRE-REQUISITES:** Basic Knowledge of Computers, Basic Knowledge of Networking and Internet

**COURSE OBJECTIVES:**

- To identify the key components of cyber security in network
- To describe the techniques in protecting Information security
- To define types of analyzing and monitoring potential threats and attacks
- To access additional external resources to supplement knowledge of cyber forensics and laws

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand, appreciate, employ, design and implement appropriate security technologies

**CO-2:** Demonstrate policies to protect computers and digital information

**CO-3:** Identify & evaluate Information Security threats and vulnerabilities in Information Systems

**CO-4:** Understand computer forensics and analyzing them

**UNIT – I:**

Introduction to Cybersecurity, Cybersecurity objectives, Cybersecurity roles, Differences between Information Security & Cybersecurity, Cybersecurity Principles - Confidentiality, integrity, & availability, Authentication & nonrepudiation, The Trinity of IT Security (CIA), Computer Protocols, Cookies, The TCP/IP

**UNIT – II:**

Who are the cyber criminals, Classification of cybercrimes, E-mail Spoofing, Spamming, Cyber defamation, Internet Time Theft, Salami Attack/ Salami Technique, Data Diddling, Forgery, Web Jacking, Newsgroup Spam/ Crimes Emanating from Usenet Newsgroup, Industrial Spying/Industrial Espionage, Hacking, Online Frauds, Pornographic Offenses, Software Piracy, Computer Sabotage, E-mail Bombing/Mail Bombs, UseNet Newsgroup as the Source of Cybercrimes, Computer Network Intrusions, Password Sniffing, Credit Card Frauds, Identity Theft.

**UNIT – III:**

**Cyber Offenses: How Criminals Plan Them:** Introduction, Categories of Cybercrime, How Criminals Plan the Attacks, Reconnaissance, Passive Attacks, Active Attacks, Scamming and Scrutinizing Gathered Information, Attack (Gaining and Maintaining the System Access), Social Engineering, Classification of Social Engineering, Cyber stalking, Types of Stalkers, Cases Reported on Cyber stalking, How Stalking Works?, Real-Life Incident of Cyber stalking, Cyber cafe and Cybercrimes,

**UNIT – IV:**

Security Threats: Introduction to security threats-Virus, Worms, Trojan horse, Bombs, Trap Door, E-Mail Virus, Virus Life cycle, How virus works?, Malware, Network and

Services attack- Dos attacks, Types of Dos attacks, Methods of attacks, Examples of attacks-SYN flooding, TCP flooding ,UDP flooding ,ICMP flooding ,Smurf, Ping of death, Tear drop, Security threats to E-commerce-Electronic payment system, Credit card/Debit cards, Smart cards, E- money, Electronic Fund Transfer, E-commerce security System, Electronic Cash, Digital Signatures

#### **UNIT – V:**

**Introduction to Computer Forensics:** computer crimes, evidence, extraction, preservation, etc. Overview of hardware and operating systems: structure of storage media/devices; windows/Macintosh/ Linux -- registry, boot process, file systems, file metadata. Data recovery: identifying hidden data, Encryption/Decryption, Steganography, recovering deleted files. Digital evidence controls: uncovering attacks that evade detection by Event Viewer, Task Manager, and other Windows GUI tools, data acquisition, disk imaging, recovering swap files, temporary & cache files, Computer Forensic tools, Network Forensic. Computer crime and Legal issues: Intellectual property, privacy issues, Criminal Justice system for forensic, audit/investigative situations and digital crime scene, investigative procedure/standards for extraction, preservation, and deposition of legal evidence in a court of law.

#### **UNIT – VI:**

**Fundamentals of Cyber law:** Evolution of the IT Act, Genesis and Necessity , Salient features of the IT Act, 2000, various authorities under IT Act and their powers, Penalties & Offences, amendments, Impact on other related Acts Cyber Space Jurisdiction - Jurisdiction issues under IT Act, 2000- Traditional principals of Jurisdiction - Extra-terrestrial Jurisdiction- Case Laws on Cyber Space Jurisdiction Sensitive Personal Data or Information (SPDI) in Cyber Law (a) SPDI Definition and Reasonable Security Practices in India (b) Reasonable Security Practices – International perspective

#### **TEXT BOOKS:**

1. Cyber Security- Understanding Cyber Crimes, Computer Forensics and Legal Perspectives, Nina Godbole and Sunit Belpure, Wiley
2. Fundamentals of Cyber Security, Mayank Bhusan, Rajkumar Singh Rathore, Aatif Jamshed, BPB Publications
3. Cyber Law & Cyber Crimes, Advocat Prashant Mali, Snow White Publications, Mumbai

#### **REFERENCES:**

(19OE1IT09) FUNDAMENTALS OF DATA SCIENCE

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To learn concepts, techniques and tools they need to deal with various facets of data science practice, including data collection and integration
- To exploring data analysis, predictive modeling, descriptive modeling, data product creation, evaluation, and effective communication
- To understand the basic knowledge of algorithms and reasonable programming experience and some familiarity with basic linear algebra and basic probability and statistics
- To identify the importance of recommendation systems and data visualization techniques

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand basic terms what Statistical Inference means. Identify probability distributions commonly used as foundations for statistical modeling. Fit a model to data

**CO-2:** Discuss the significance of exploratory data analysis (EDA) in data science and to apply basic tools (plots, graphs, summary statistics) to carry out EDA

**CO-3:** Apply basic machine learning algorithms and to identify common approaches used for Feature Generation

**CO-4:** Analyze fundamental mathematical and algorithmic ingredients that constitute a Recommendation Engine and to Build their own recommendation system using existing components

**UNIT – I:**

**Introduction:** What is Data Science? - Big Data and Data Science hype – and getting past the hype - Why now? – Datafication - Current landscape of perspectives - Skill sets needed - Statistical Inference - Populations and samples - Statistical modeling, probability distributions, fitting a model - Intro to R

**UNIT – II:**

Exploratory Data Analysis and the Data Science Process - Basic tools (plots, graphs and summary statistics) of EDA - Philosophy of EDA - The Data Science Process - Case Study: Real Direct (online real estate firm) - Three Basic Machine Learning Algorithms- Linear Regression - k-Nearest Neighbors (k-NN) - k-means

**UNIT – III:**

One More Machine Learning Algorithm and Usage in Applications - Motivating application: Filtering Spam - Why Linear Regression and k-NN are poor choices for Filtering Spam - Naive Bayes and why it works for Filtering Spam

**UNIT – IV:**

**Data Wrangling:** APIs and other tools for scrapping the Web - Feature Generation and

Feature Selection (Extracting Meaning From Data) - Motivating application: user (customer) retention - Feature Generation (brainstorming, role of domain expertise, and place for imagination) - Feature Selection algorithms – Filters; Wrappers; Decision Trees; Random Forests

#### **UNIT – V:**

**Recommendation Systems:** Building a User-Facing Data Product - Algorithmic ingredients of a Recommendation Engine - Dimensionality Reduction - Singular Value Decomposition - Principal Component Analysis - Exercise: build your own recommendation system - Mining Social-Network Graphs - Social networks as graphs - Clustering of graphs - Direct discovery of communities in graphs - Partitioning of graphs - Neighbourhood properties in graphs

#### **UNIT – VI:**

Data Visualization - Basic principles, ideas and tools for data visualization 3 - Examples of inspiring (industry) projects - Exercise: create your own visualization of a complex dataset - Data Science and Ethical Issues - Discussions on privacy, security, ethics - A look back at Data Science - Next-generation data scientists

#### **TEXT BOOKS:**

1. Doing Data Science, Straight Talk From The Frontline. Cathy O'Neil and Rachel Schutt, O'Reilly, 2014
2. Mining of Massive Datasets v2.1, Jure Leskovek, Anand Rajaraman and Jeffrey Ullman, Cambridge University Press, 2014
3. Machine Learning: A Probabilistic Perspective, Kevin P. Murphy, 2013 (ISBN 0262018020)

#### **REFERENCES:**

(19OE1AE05) INTRODUCTION TO ADVANCED VEHICLE TECHNOLOGIES

**COURSE PRE-REQUISITES:** None

**COURSE OBJECTIVES:**

- To understand the layout of an automobile and functionalities chassis elements
- To provide the concepts of automotive electrical systems and electric & hybrid vehicles
- To present various intelligent automotive systems and levels of vehicle autonomy

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Explain the functionalities of automotive systems and subsystems

**CO-2:** Discuss the concepts of automotive electrical systems and electric & hybrid vehicles

**CO-3:** Describe various intelligent automotive systems and levels of vehicle autonomy

**UNIT – I:**

**Introduction:** Classification of automobiles, layout of an automobile and types of bodies.

**Automotive Chassis:** Introduction to chassis systems - engine, cooling, lubrication, fuel feed, ignition, electrical, driveline - clutch, transmission, propeller shaft, differential, axles, wheels and tyres, steering, suspension and braking.

**UNIT – II:**

**Engine:** Working principle of four stroke and two stroke SI and CI engines, fuel system – layout of petrol and diesel fuel systems, electronic fuel injection - multi-point fuel injection, gasoline direct injection, common rail direct injection.

**UNIT – III:**

**Electrical System:** Simple automotive wiring diagram and components of electrical system, starting system – starter circuit, standard Bendix and over running clutch drive, charging system – alternator, cut-outs and regulators, ignition system - conventional and electronic ignition system.

**UNIT – IV:**

**Electric and Hybrid Vehicles:** Electric vehicle – Layout, components, configurations, advantages and limitations. Hybrid vehicle - Concepts of hybrid electric drivetrain based on hybridization and powertrain configuration, architecture of series, parallel and series-parallel hybrid electric drivetrains, modes of operation, merits and demerits.

**UNIT – V:**

**Intelligent Vehicle Systems:** Automotive navigation, night vision, head-up display, airbag, seat belt tightening system, immobilizers, adaptive cruise control, forward collision warning, lane departure warning and anti-lock braking system.

**UNIT – VI:**

**Autonomous Vehicles:** Levels of automation, research, challenges, commercial development, sensor systems, sensor suits, environmental challenges, graceful degradation, V2V and V2I communication, sharing the drive, integrity, security, verification and policy implications.

**TEXT BOOKS:**

1. Advanced Vehicle Technology, Heinz Heisler, Butterworth Heinemann, 2002
2. Intelligent Vehicle Technologies: Theory and Applications, Ljubo Vlacic, Michel Parent and Fumio Harashima, Butterworth-Heinemann, Oxford, 2001
3. Modern Electric, Hybrid Electric and Fuel Cell Vehicles: Fundamentals, Theory and Design, Mehrdad Ehsani, Yimin Gao, Sebastien E. Gay and Ali Emadi, CRS Press, 2004

**REFERENCES:**

1. Automotive Mechanics, Giri N. K., Khanna Publications, 2006
2. Automotive Electrical Equipment, Kohli P. L., Tata McGraw Hill Co., Ltd., New Delhi, 1975
3. Electric and Hybrid Vehicles – Design Fundamentals, Iqbal Husain, CRC Press, 2010
4. Autonomous Vehicle Technology-A Guide for Policymakers, James M. Anderson, Nidhi Kalra, Karlyn D. Stanley, Paul Sorensen, Constantine Samaras, Oluwatobi A. Oluwatola, RAND Corporation, Santa Monica, Calif., 2016

# GENERAL POOL

Offered by:

**COGNIZANT**

## Courses in the OE Pool:

- Introduction to Application Development with C#
- Introduction to Application Development with Java
- Introduction to Application Development with Python

VNR VIGNANA JYOTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY

B.Tech.

L	T/P/D	C
3	0	3

(19OE1CS12) INTRODUCTION TO APPLICATION DEVELOPMENT WITH C#

**COURSE OBJECTIVES:**

- To create an integrated development environment for object-oriented C# programs
- To build website menus with CSS and JavaScript
- To relate programming language constructs and problem-solving techniques
- To analyze and Apply modifications to C# programs that solve real-world problems

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand the fundamentals of HTML5 and define the styles for web pages using CSS

**CO-2:** Create web pages and add dynamic behavior to web pages using Javascript

**CO-3:** Communicate with the database using SQL

**CO-4:** Develop a simple CUI [Character User Interface] based application using C# & SQL

**UNIT – I:**

**Computer, Software Engineering Fundamentals & OOP:** Introduction to Computer Basics, Basics of Network, Networking Levels and Layers and Protocols, Protocol Stacks, Networking and Internet Service, Software Engineering Fundamentals - Overview of Requirement Analysis, Overview of Software Design, Overview of Software Implementation, Overview of Testing, Overview of Software Maintenance, Overview of Configuration management and version Control, Agile Basics, OOP - Object Oriented Concepts, Objects and Classes, Principles in Object-Oriented technology

**Usecase:** Create a class for BankAccount

**UNIT – II:**

**HTML & CSS:** Introduction to Web Technology, Introduction to HTML5, HTML5 Elements, Semantic Elements, Table, List, Working with Links, Image Handling, Form-Input Elements, HTML5 Form elements, HTML5 Attributes, Video & Audio, iframes, CSS - Introduction to CSS3, CSS Syntax, CSS Styling, Text and Fonts properties, CSS Selectors, Different color schemes, CSS Borders, CSS Margins, CSS Backgrounds

**Usecase:** Create a website for college

**UNIT – III:**

**JavaScript, RDBMS Concepts and SQL:** JavaScript basics, Functions in Javascript, Javascript validation, Events, Javascript event handling, JavaScript Strings, JavaScript Dates, Array in Javascript, Document Object Model (Window, Frame, Navigator Objects), Working with Document Object (Its Properties and methods, Cookie handling), Introduction to RDBMS Concepts, Introduction to SQL, Creating and

Managing Tables, Data Manipulation, Basic SQL SELECT Statements, Scalar & Aggregate Functions, Joins & Subqueries, Views & Index

**Usecase:** Apply validations for Telephone Complaint Registration Form

**Usecase:** Create student table for College Management System(CMS)

#### **UNIT – IV:**

**Introduction to C# Programming:** Introduction to .NET Framework 4.5 - What is .NET Framework, .NET Framework, Languages, and Tools, .NET Framework Major Components, Common Language Runtime (CLR), Compilation and Execution in .NET, Understand the .NET Framework 4.5stack, Exploring VS2017, Introduction to C# 6.0 - Features of C#, C# Compilation and Execution, General Structure of a C# Program, Creating and Using a DLL

**Usecase:** Create a Console Application (.exe) project called CalcClientApp

#### **UNIT – V:**

**Language Fundamentals of C#:** Language Fundamentals - Keywords, Value Types and Reference Types, Implicit and explicit type conversions, Boxing and Unboxing, Enum, Operators and Assignments, Variables and Literals, Flow

Control: C# Control Statements, Nullable, Classes and Objects, Strings, Array, Generic Collections

**Usecase:** Store employee objects using Generic Collections

#### **UNIT – VI:**

**Basics of ADO.NET:** Various Connection Architectures, Understanding ADO.NET and its class library, Important Classes in ADO.NET, Connection Class, Command Class, DataReader Class, DataAdapter Class, DataSet Class

**Usecase:** Implement ADO.NET classes that belong to both Connected and Disconnected Architectures

#### **TEXT BOOKS:**

1. Web Programming, Building Internet Applications, Chris Bates, 2nd Edition, Wiley Dreamtech
2. Introduction to Database Systems, C.J.Date, Pearson Education
3. Professional C# 2012 with .NET 4.5, Christian Nagel et al. Wiley India, 2012

#### **REFERENCES:**

1. Programming World Wide Web, Sebesta, Pearson
2. Internet and World Wide Web – How to program, Dietel and Nieto PHI/Pearson Education Asia
3. Database Development and Management, Lee Chao, Auerbach Publications, Taylor & Francis Group
4. Pro C# 2010 and the .NET 4 Platform, Andrew Troelsen, 5<sup>th</sup> Edition, A Press, 2010
5. Programming C# 4.0, Ian Griffiths, Matthew Adams, Jesse Liberty, 6<sup>th</sup> Edition, O'Reilly, 2010

### (19OE1CS13) INTRODUCTION TO APPLICATION DEVELOPMENT WITH JAVA

#### COURSE OBJECTIVES:

- To create an integrated development environment for object-oriented Java programs
- To build website menus with CSS and JavaScript
- To relate programming language constructs and problem solving techniques
- To analyze and Apply modifications to Java programs that solve real-world problems

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand the fundamentals of HTML5 and define the styles for web pages using CSS

**CO-2:** Create web pages and add dynamic behavior to web pages using Javascript

**CO-3:** Communicate with the database using SQL

**CO-4:** Develop a simple CUI [Character User Interface] based application using Java & SQL

#### UNIT – I:

**Computer:** Computer Fundamentals, Preface to Networks, Networking Levels, Layers of Computer Networks, Protocol Stacks, Networking, and Internet Service

**Software Engineering Fundamentals:** Introduction, Requirements Collection & Analysis, Fundamentals of Software Design, Software Implementation, Types of Testing, Software Maintenance, Overview of Configuration management and version Control Tools, Basics of Agile Process

**Object Oriented Programming:** Object Oriented Paradigm, Classes and Objects, Principles in Object- Oriented technology

**Use case:** Create a class for Bank Account

#### UNIT – II:

**HTML:** Introduction to Web Technology, HTML5 Introduction, HTML5 Elements, Semantic Elements, Table, List, Links in HTML5, Handling of Images, Form Elements, HTML5 Form elements and Attributes, Video & Audio, iframes

#### Style Sheets:

Introduction to CascadingStyleSheet3, CSS Syntax, CSS Styling, Text and Fonts properties, CSS Selectors, Color schemes, CSS Borders, CSS Margins, CSS Backgrounds

**Use case:** Design a website for college

#### UNIT – III:

**JavaScript:** Introduction to JavaScript, JavaScript Functions, JavaScript validation, Event handling in JavaScript, JavaScript Strings, JavaScript Dates, Array in JavaScript, Document Object Model (Window, Frame, Navigator Objects), Document Object (Its Properties and methods, Cookie handling),

**RDBMS Concepts and SQL:** Introduction to RDBMS Concepts, Introduction to SQL, Creating and Managing Tables, Data Manipulation, Basic SQL SELECT Statements, Scalar & Aggregate Functions, Joins & Subqueries, Views & Index

**Use case:** Check the validations for Telephone Complaint Registration Form

**Use case:** Create student table for College Management System (CMS)

#### **UNIT – IV:**

**Introduction to Java:** Java Environment, Java Fundamentals - Keywords, Primitive Data Types, Operators and Assignments, Java's Control Statements, Wrapper Classes, Using Scanner Class, Strings - String Handling functions, Array - One dimensional array, Array of Objects, Using Arrays class, variable length arguments

**Usecase:** To keep track of customers data who are buying products from a store

#### **UNIT – V:**

**The Collection Framework:** Lists – Array List, LinkedList, Stack, Vector, Set – HashSet, Linked Hash Set, Tree Set, Map – HashMap, Linked HashMap, Hash table. Retrieving Elements from Collections – Enumeration, Iterator, List Iterator, String Tokenizer – Sorting using Comparable and Comparator.

**Usecase:** Store employee objects using collection framework

#### **UNIT – VI:**

**JDBC:** Overview of JDBC, JDBC Architecture, Types of JDBC Drivers. Process SQL with JDBC - Create Connection, Query, Update

**Use case:** Write the menu driven program using JDBC which will have following options

- a. Store
- b. Display by id
- c. Delete by id
- d. Update salary by id
- e. Exit

#### **TEXT BOOKS:**

1. Web Programming, Building Internet Applications, Chris Bates, 2<sup>nd</sup> Edition, Wiley Dreamtech
2. Introduction to Database Systems, C.J. Date, Pearson Education
3. Big Java, Cay Horstmann, John Wiley and Sons, 2<sup>nd</sup> Edition

#### **REFERENCES:**

1. Programming World Wide Web, Sebesta, Pearson
1. Internet and World Wide Web – How to program, Dietel and Nieto PHI/Pearson Education Asia
2. Database Development and Management, Lee Chao, Auerbach Publications, Taylor & Francis Group
3. Java How to Program, H.M.Dietel and P.J.Dietel, 6<sup>th</sup> Edition, Pearson Education/PHI
4. Core Java 2, Vol. 1, Fundamentals, CayS. Horstmann and Gary Cornell, 7<sup>th</sup> Edition, Pearson Education

### (19OE1CS14) INTRODUCTION TO APPLICATION DEVELOPMENT WITH PYTHON

#### COURSE OBJECTIVES:

- To create an integrated development environment for object-oriented Python programs
- To build website menus with CSS and JavaScript
- To relate programming language constructs and problem-solving techniques
- To analyze and Apply modifications to Python programs that solve real-world problems

**COURSE OUTCOMES:** After completion of the course, the student should be able to

**CO-1:** Understand the fundamentals of HTML5 and define the styles for web pages using CSS

**CO-2:** Create web pages and add dynamic behavior to web pages using Javascript

**CO-3:** Communicate with the database using SQL

**CO-4:** Develop a simple CUI [Character User Interface] based application using Python & SQL

#### UNIT – I:

**Concepts of Networks, Overview of Software Engineering & OOP:** Computer Basics, Network basics, Networking Levels, Layers and Protocols, Protocol Stacks, Networking and services of Internet

**Software Engineering lifecycle** - Overview of Requirement Analysis, Software Design, Implementation of software, Outline of Testing, Maintenance, Configuration management and version Control, Agile fundamentals

**OOP** - Object Oriented Concepts, OOP Principles

**Usecase:** Create a class for Employee Account

#### UNIT – II:

**Introduction to Web Technology:** Overview of Web Technology, Introduction to HTML5, HTML5 Elements, Semantic Elements, Table, List, Links, Image Handling, Form-Input Elements, HTML5 Form elements, HTML5 Attributes, Video & Audio, iframes,

**CSS** - Introduction to CSS3, CSS Syntax, CSS Styling, Text and Fonts properties, CSS Selectors, Different color schemes, CSS Borders, Margins, Backgrounds

**Usecase:** Create a website for an institution

#### UNIT – III:

**Outline of JavaScript, RDBMS Concepts and SQL:** JavaScript basics, Functions ,validations, Events, handling events ,Strings, Dates, Arrays, DOM(Window, Frame, Navigator Objects), Document Object -Properties and methods, handling of Cookies, RDBMS Concepts, SQL, Management of Tables, Manipulation of tables, SQL SELECT Statements, Scalar & Aggregate Functions, Joins &Sub queries, Views & Index

**Usecase:** Apply validations for Telephone Complaint Registration Form

**Usecase:** Create student table for College Management System (CMS)

#### **UNIT – IV:**

**Introduction to Python:** Introduction, Features of Python, Versions, Keywords and Identifiers, Statements & Comments, Variables, Datatypes, Type Conversion, I/O and import, Language Fundamentals - Operators, Namespace, Modules in Python, Python DateTime

**Usecase:** Develop an application using Python for accepting your personal details and display the same

#### **UNIT – V:**

**Classes and Objects:** Classes and Objects in Python? Advantages of Using Classes in Python, Defining a Class in Python, Creating an Object in Python, The self, The\_init\_() function in Python, class and instance variables, Python Inheritance and its Types, Strings, Lists, Sets, Tuples, Dictionary

**Usecase:** Store employee objects using various data structures

#### **UNIT – VI:**

**Advance Concepts in Python:** Array - What is an Array, Difference between Array and List in Python, Creating an Array, Accessing a Python Array Element, Basic Operations of Arrays, Functions - Creating a Function, Calling a Function, Pass by reference vs value, Required arguments, Keyword arguments, Default arguments, Variable-length arguments, The Anonymous Functions, The return Statement, Global vs. Local variables, Modules - What is a Module?, Create a Module, Use a Module, Variables in Module, Naming a Module, Renaming a Module, Built-in Modules, Using the dir() Function, Import From Module, Packages, NumPy

**Usecase:** Develop an application for Hospital Management System(HMS)

#### **TEXT BOOKS:**

1. Web Programming, Building Internet Applications, Chris Bates, 2<sup>nd</sup> Edition, Wiley Dreamtech
2. Introduction to Database Systems, C.J. Date, Pearson Education
3. Python Programming: A Modern Approach, Vamsi Kurama, Pearson

#### **REFERENCES:**

1. Programming World Wide Web, Sebesta, Pearson
2. Internet and World Wide Web – How to program, Dietel and Nieto PHI/Pearson Education Asia
3. Database Development and Management, Lee Chao, Auerbach Publications, Taylor & Francis Group
4. Core Python Programming, W.Chun, Pearson
5. Introduction to Python, Kenneth A. Lambert, Cengage
