Address of Applicant :Assistant Professor Department of Health System Management Studies(Faculty of Management Studies) JSS Academy of Higher Education & Research, Mysuru ----------- -----------
  10)**Mr. Sai Venkata Raman T**
Address of Applicant :Research Scholar, Department of Physics, Agragami Group of Educational Institutions, Yelahanka Satellite Town, Yelahanka, Bengaluru- 560064 ----------- -----------
  11)**Mr. Shashi Kant Gupta**
Address of Applicant :Researcher, Department of CSE, Integral University, Lucknow, UP, India ----------- -----------

(57) Abstract :
It includes an RMS server with an RMS database that contains files holding information on workers, their talents, their schedules, and the projects they are working on. As well as direct input, RMS database files include information from external business databases. Employees' planned activities are shown on a calendar in various ways, with various sorts of scheduled activities emphasized in different colors. Human resources with the necessary skills and availability may be found and assigned to projects using a search and scheduling feature. To narrow the scope of the search, criteria such as the amount of time required, the degree of expertise required, and other factors are input. This feature allocates the personnel to the projects and updates the system calendar with the project assignments. Information contained in the RMS database may be updated via interfaces with other databases. The RMS and external databases may be seen via a single user interface. It is necessary to use a computer application to run the RMS server and the RMS database
